

Evidence Room

Agents that earn responsibility.

AP Agent Operating System

Evidence Room is the governed agent layer for Accounts Payable — templates, controls, KPIs, and earn-up playbooks so finance teams can put AI to work on invoice-to-pay without pretending agents are already trustworthy. Complements your AP and ERP stack.

Who it's for

Controllers, AP managers, and Finance Ops leaders who will not rubber-stamp AI.

The method

Observe → Recommend → Draft → Execute (narrow) → Expand — with kill-switches and evidence packs.

Product ladder

Tier	Promise
Free Readiness	35-question diagnostic, maturity, KPI baseline
Starter \$79	Operating model + ten condensed blueprints
Pro / Team	Full OS spine; Team adds change & seats
Custom \$1.5–3k	Client-specific agent blueprints

Positioning lines

- Evidence before autonomy.
- Promotion gates for agents. Accountability for humans.
- Built for Controllers who will not rubber-stamp AI.

Industry context only (Ardent Partners 2025): \$9.84 avg cost/invoice · 18.4% exceptions · 35.4% STP — external benchmark, not a guarantee.

Store: Digital goods via Merchant of Record · No guaranteed savings · Humans accountable.
