

EVIDENCE ROOM

AP Transformation Blueprint

Productised assessment and roadmap service

Tier 4 · US\$1,500–3,000

Operating Evidence · Not legal, tax, or accounting advice

AP Transformation Blueprint — Service Brochure

Product: Evidence Room — Custom Blueprint (productised service) **Document ID:** ER-BP-BR0-001 **Version:** 1.0 **Price band:** US\$1,500–3,000 **Brand idea:** Operating Evidence

Cover

Evidence Room AP Transformation Blueprint

A productised design engagement — not a multi-month consultancy theatre

For Finance teams that need a **stack-specific operating blueprint** for AP agents: charters, exception design, control gates, KPI baselines, and a 90-day plan tailored to **your** ERP, channels, and organisation — delivered as reusable artefacts you keep.

1. Who this is for

Strong	Controllers / Heads of AP / Transformation leads with complex AP (multi-channel, ERP-backed, audit-sensitive) who completed or plan Team/Pro and need localisation
Strong	Shared Services leaders standardising agent operating rules across entities
Weak	Buyers seeking autonomous payment software, ERP selection RFPs, or guaranteed savings projects
Weak	Prompt-only curiosity without control ownership

2. What you buy

A **fixed-scope, fixed-band** deliverable pack — not open-ended advisory days.

Discovery	Structured intake + stakeholder interviews (bounded)
Operating blueprint	Localised agent backlog, charters for agreed agents, responsibility ceilings
Exception design	Taxonomy adoption map + ownership matrix for your slice
Control design	Payment boundary confirmation, SoD notes, promotion gates
Measurement	Baseline KPI worksheet populated from your extracts (where available)
Plan	90-day implementation plan with owners

Readout	Executive session (remote) with decision log
---------	--

Optional within band (scoping): additional entity variant; deeper A12/A10 control design; training outline localisation.

3. Price band guidance

Focused	One entity, one channel, ≤3 agents, taxonomy + 90-day plan	US\$1,500
Standard	One entity, multi-channel, ≤5 agents, control pack, exec readout	US\$2,250
Extended	Multi-entity variance notes, ≤8 agents sketched, training outline, steering ToR draft	US\$3,000

Final quote confirmed after intake — still inside US\$1,500–3,000 unless you explicitly expand to a separate SOW.

Licence to use deliverables internally is included. Resale / white-label across multiple client organisations requires a separate commercial licence.

4. Method (Observe → Structure → Agentise — bounded)

- 1 **Intake questionnaire** completed
- 2 **Document & data room** (process maps, ageing samples, DOA summary — masked)
- 3 **Interviews** (typically 4–6 × 45 min)
- 4 **Blueprint drafting** (AI-assisted analysis + expert operating design)
- 5 **Working review** with Process Owner
- 6 **Executive readout** + decision log
- 7 **Handoff** of markdown/PDF pack + template completions

We use AI to accelerate structuring and drafting. **Judgement on controls, ceilings, and payment boundaries remains human** — yours and ours in review.

5. What we will never sell you in this service

- Autonomous payment implementation
- Guaranteed savings, ROI, or fraud detection rates
- Compliance certification
- ERP replacement or vendor selection as primary scope
- Unlimited advice hours disguised as a fixed fee without change control

6. Prerequisites

- Named Process Owner and Sponsor
- Willingness to set an autonomy ceiling ≤ L2 for the engagement horizon
- Access to *some* operational truth (even imperfect ageing)
- Controllership availability for payment boundary confirmation

Holding **Professional** or **Team** product artefacts accelerates delivery but is not mandatory; Blueprint can stand alone with reduced reuse speed.

7. Timeline (typical)

0	Intake + quote confirm + kickoff
1	Interviews + data room review
2	Draft blueprint
3	Review → final pack + readout

Focused band may compress to ~10–12 business days if intake is complete.

8. Differentiation

Tool vendor SOW	Features ≠ operating model
Big consulting	Cost/time; slide-heavy; less reusable OS artefacts
DIY Starter/Pro only	Faster with expert localisation under deadline
Prompt packs	No governance, taxonomy, or executive decision design

Evidence Room remains the **Operating Evidence** layer — Blueprint is that layer fitted to you.

9. Next step

- 1 Complete `02\_INTAKE\_QUESTIONNAIRE.md`
- 2 Receive band recommendation + confirmation
- 3 Kickoff

Contact via your Evidence Room purchase channel / service desk as published at sale.

10. Disclaimers

Educational and operating-design service. Not legal, audit, or accounting advice. No outcome guarantees. Payment authorisation remains your human control environment.

Evidence Room — Operating Evidence. *ER-BP-BR0-001 v1.0*
