

DIGITAL PRODUCT

Quick Start

Bought Friday. Usable Monday. Twelve steps. One first agent.

If you bought Professional

1. Open this folder: 03_AP_AGENT_OS_PRO
2. Read the Professional OS PDF, then the workforce index.
3. Walk 01–12 on the OS cover page. Do not skip 06–09 to “get to AI.”
4. Use the registry, control matrix and KPI scorecard as living files — copy to your tenant.

If you bought Team

Run the 4-hour workshop deck first. Then the playbook. Then Professional files.

If you downloaded the Diagnostic

Book 90 minutes. Answer with unknowns. Score in the workbook. The email sequence will offer Starter / Professional — ignore it until you have a band.

MONDAY MORNING

Pick the failure mode, not the flashiest agent. Missing GR, duplicates, or match usually pay for the week. Payment execution never does — we do not sell it.
