AP Agent Workforce

Sixteen agents. One owner each. Responsibility earned, never assumed.

Agent workforce

ID	Agent	Owner	Start level	Purpose
A01	Invoice Intake Agent	AP Operations Lead	0	Decide whether an inbound invoice is complete, correctly extracted and fit for downstream validation.
A02	Invoice Validation Agent	AP Quality Lead	0	Test whether supplier, invoice number, date, PO, legal entity, currency, amount, tax and lines are valid and unique enough to proceed.
A03	Matching Agent	P2P Process Owner	1	Perform PO, price, quantity and receipt matching, including tolerances and multi-line invoices.
A04	Exception Triage Agent	AP Manager	1	Classify every AP exception into the Evidence Room taxonomy and recommend the next human or agent action.
A05	Goods Receipt Agent	AP + Warehousing / Requestor process owner	1	Find missing or partial receipts, identify the likely receiver or PO owner, and prepare a follow-up pack.
A06	PO Quality Agent	Procurement Operations / P2P Owner	1	Detect poor PO practices that create downstream AP exceptions — wrong price, thin quantity, expired PO, bad coding, wrong vendor, blanket-PO abuse.
A07	Approval Agent	Financial Controller / DoA owner	1	Watch the approval graph for stalls, absence, broken delegation, DoA breaches and payment-deadline risk.
A08	Supplier Resolution Agent	AP Supplier Desk	2	Draft supplier communication for missing PO, duplicates, incorrect invoices, missing information, credit notes and statement differences.
A09	Internal Follow-Up Agent	AP Team Lead	2	Draft and manage internal follow-ups for missing GR, incorrect PO, approvals, coding, requester clarification and business-owner action.
A10	Duplicate & Anomaly Agent	AP Controls Lead	1	Surface exact duplicates, near-duplicates, repeated amounts, invoice-number variation, supplier anomalies and unusual payment characteristics as indicators — never as a fraud verdict.
A11	Vendor Statement Reconciliation Agent	AP Reconciliation Lead	1	Reconcile supplier statements to AP and isolate missing invoices, missing credits, unallocated payments and timing differences.
A12	Payment Proposal Review Agent	Treasury / Payment Authoriser (human)	1	Perform pre-payment analytical review: duplicates, unusual changes, high-value items, missing approvals, holds, unexpected master-data or bank changes. Does not authorise payment.
A13	AP Close Agent	Financial Controller	1	Support month-end: unresolved and unprocessed invoices, blocked items, aged receipts, accrual candidates, cut-off and completeness.
A14	AP Reporting Agent	AP Manager	2	Produce daily, weekly and monthly operating packs from the same metric dictionary — not a new spreadsheet each time.
A15	Root Cause Agent	Process Excellence / AP Manager	1	Turn recurring exceptions into systemic causes: supplier quality, PO discipline, employee behaviour,

ID	Agent	Owner	Start level	Purpose
				receipt discipline, configuration, master data, approval structure.
A16	AP Manager / Orchestrator Agent	Head of AP / Shared Services AP Lead	1	Supervise the agent workforce: distribute work, watch queues, prioritise, escalate, report, and recommend whether an agent has earned more or less responsibility.

Responsibility model

Level	Name	Meaning
0	Observe	Reviews and logs. Cannot recommend as authoritative.
1	Recommend	Produces a recommendation with rationale and confidence.
2	Prepare	Drafts actions, comms and packets. Human must approve send/post.
3	Execute in guardrails	May perform pre-approved low-risk actions inside hard limits.
4	Managed autonomy	Bounded population, exception-based review, no self-expansion.

DO

Promote by category and vendor population, not globally. A03 may earn Level 3 on SKUs and remain Level 1 on services.

DO NOT

Set Level 4 as a project milestone. Level 4 is a residual state after evidence, recertification and a named owner.
