AP Agent KPI Dictionary

Definitions and formulas. Four families. No vanity metrics in the steer pack.

Four families

Activity without outcomes is vanity. Risk without operations is theatre. Financials without a controller attestation are marketing.

Family	ID	Name	Question	Formula
Activity	ACT-01	Invoices handled by agents	How much volume did agents touch?	Count of invoices with an agent decision in period
Activity	ACT-02	Exceptions handled	How many exceptions did the workforce work?	Count of exception tickets moved from New
Activity	ACT-03	Follow-ups sent	How much chase activity occurred?	Count of A08/A09 messages sent
Operational	OPS-01	Straight-through processing rate	What share posted with no human exception touch?	STP invoices / invoices posted
Operational	OPS-02	Exception rate	What share of invoices excepted?	Excepted invoices / invoices received
Operational	OPS-03	Classification accuracy	How often is the taxonomy code right?	QA-agreed codes / QA sample
Operational	OPS-04	Extraction accuracy	Are header and line fields correct vs source?	Correct fields / fields sampled (header and lines reported separately)
Operational	OPS-05	Matching accuracy	Are match decisions correct?	Correct match decisions / sampled matches
Operational	OPS-06	False-positive rate	How often do we flag a healthy item?	False flags / flags
Operational	OPS-07	False-negative rate	How often do we miss a real defect?	Missed defects / known defects (including injected test cases)
Operational	OPS-08	Exception resolution rate	What share of exceptions close in SLA?	Closed in SLA / exceptions due
Operational	OPS-09	Human intervention rate	What share still needs a person?	Invoices with human edit or decision / invoices
Operational	OPS-10	Average resolution time	How long do exceptions live?	Median hours, New → Closed
Operational	OPS-11	Time to invoice posting	How long from intake to posted?	Median hours, Intake → Posted
Operational	OPS-12	Repeat exception rate	Are we fixing causes?	Exceptions whose cause code recurred for same vendor/buyer in 8 weeks / exceptions
Operational	OPS-13	On-time supplier follow-up	Did we chase on time?	A08 sent on or before due / A08 due
Operational	OPS-14	On-time internal follow-up	Did we chase owners on time?	A09 sent on or before due / A09 due
Operational	OPS-15	Ageing — >30 day unresolved	Is the backlog rotting?	Open exceptions >30 days / open exceptions
Operational	OPS-16	Payment-on-time rate	Did we pay when we intended?	

Family	ID	Name	Question	Formula
				Payments on or before due / payments (policy-due, not supplier-due if they differ)
Operational	OPS-17	Missing-receipt reduction	Is GR discipline improving?	Missing-GR count period-end vs baseline
Operational	OPS-18	PO compliance	Are invoices backed by a valid PO when policy requires?	PO-compliant invoices / invoices in PO-required categories
Financial	FIN-01	Cost per invoice	What does processing one invoice cost us?	(AP fully loaded labour + AP tech + allocated overhead + AI/tool) / invoices posted
Financial	FIN-02	Cost per exception resolved	What does an exception cost?	Exception-handling labour + AI / exceptions closed
Financial	FIN-03	AI inference cost	What did the models and tools cost?	Invoiced AI/tool spend in period
Financial	FIN-04	Cost per correct outcome	What do we pay for a right answer?	(AI + human review cost) / QA-correct decisions
Financial	FIN-05	Estimated human hours released	How much capacity returned?	Baseline minutes × volume × measured touch reduction / 60 — range, not a point
Financial	FIN-06	Validated financial savings	What savings survived finance challenge?	Savings with a named Controller attestation in the period
Financial	FIN-07	Early-payment discount captured	Did we take discounts we intended?	Discounts taken / discounts available under policy
Financial	FIN-08	Late-payment cost	What did lateness cost?	Fees + documented commercial penalties + estimated relationship cost (labelled if estimated)
Risk	RSK-01	Control breaches	Did we break a written control?	Count of confirmed breaches (SoD, unauthorised send, bank-data write, payment release by agent)
Risk	RSK-02	Escalation rate	How often do we need a senior human?	Escalations / exceptions
Risk	RSK-03	Audit exceptions	What did internal/ external audit find in AP/ AI?	Count and severity
Risk	RSK-04	Rework rate	How often is an agent output rejected?	Rejected drafts or reversed decisions / outputs
Risk	RSK-05	Override rate	How often do humans override the agent?	Overrides / agent decisions
Risk	RSK-06	Injection / suspicious-input flags	Are we seeing instruction-like content?	Flags / invoices
Risk	RSK-07	Duplicate payments prevented (confirmed)	Did a human-confirmed stop avoid a second payment?	Count of stopped items later confirmed duplicate
Risk	RSK-08	Unauthorised agent action	Did an agent act above its level?	Count — target 0
