AP Agent OS — Team Playbook

Workshop-ready programme guide for one legal entity: facilitation, change, steer, and a 90-day plan a transformation lead can run.

How to run this as a programme

Team Edition is licensed for internal use by one legal entity. It is designed so a Finance Transformation lead can walk into a room tomorrow and run a credible session — not a brainstorm, a working session with artefacts.

Workshop — 4 hours (core) or 1.5 days (full)

Block	Minutes	Outcome
Why agents, not tools	20	Shared definition; payment authority stays human
Current-state evidence	40	Volume, exceptions, unknown list
Process map one lane	50	Real invoice, real systems
Taxonomy coding drill	30	12 exceptions coded
Pick first agent	25	Charter skeleton
Controls & injection	25	Bank-change and SoD lines
KPI and baseline	20	Three metrics, four-week window
90-day plan	20	Named owners, kill criteria
Steer story	10	What the CFO will hear

Roles in the room

Sponsor (CFO/FD) for the first and last 20 minutes. AP manager (whole time). Controller. P2P/procurement ops. Finance systems. Controls or internal audit observer. Optional: automation lead. Do not run this only with the AI team.

Change

The message to AP staff is not “the agents are coming for the roster.” It is: repeatable extraction, matching maths and chase drafts move to supervised agents; judgement, suppliers, controls and improvement stay human. Works-council or privacy review may be required before monitoring individual follow-up performance — flag it, do not improvise.
