

AP Agent Readiness Diagnostic

Thirty-six questions across Process, Data, Controls, Technology, Talent, and Economics. Score 0–4 with the lowest fully true number. Do not upload invoices. Not a certificate, ROI model, fraud assessment, or compliance audit.

How to sit it

- One scorer, one challenger. The challenger asks “show me the artefact.”
- Average each dimension. Do not collapse six averages into one corporate grade.
- If A5 (payment procedure) is 0 or 1, do not place maturity above L2.
- Timebox: 60 minutes.

What you leave with

Six dimension averages, veto notes, a maturity band (L1–L5), a first-wave agent recommendation, and a business-case starter that will not invent a savings number.

Proof before permission. The diagnostic measures whether you have an agent layer — or a pile of prompts.
