AP Agent Starter Kit

A working subset of the operating system: operating model, ten Wave 1/2 blueprints, exception starter list, human-vs-agent card, process map, job-description and instruction templates, KPI scorecard, governance checklist, implementation ticks, and a wave roadmap.

Top ten blueprints

- Invoice Intake · Validation · Matching · Exception Triage
- Goods Receipt · Approval · Supplier Resolution · Internal Follow-up
- Duplicate & Anomaly (flags only) · Payment Proposal Review (annotate only)

Payment authorisation remains human. Duplicate & Anomaly is not a fraud-detection guarantee.

EVIDENCEROOM.AI · DESIGN THE LAYER. KEEP THE STACK. · NOT LEGAL ADVICE.
