

## EVIDENCE ROOM

# AP AI Readiness Diagnostic

Tier 0 · Free · Self-assessment for Finance leaders

*Evidence over hype. Governed agents. Measurable outcomes.*

Not a prompt pack. Not an ERP. Not autonomous payments. An operating system toolkit for designing, governing, and measuring AP agents.

## Purpose

Most AP AI programmes fail because organisations buy tools before they know whether process, data, controls, and operating model can absorb agents. This diagnostic produces a readiness score, maturity level, and opportunity heatmap for Monday steering discussions.

## How to score

Score 35 questions from 1 (absent) to 5 (optimising). Total max 175. Maturity index = Total / 35. Levels: Initial 1.0–1.9 · Developing 2.0–2.9 · Defined 3.0–3.9 · Managed 4.0–4.4 · Optimising 4.5–5.0.

## Domains

- Strategy
- Process
- Data
- Systems
- Controls
- People
- Measurement
- Agents
- Suppliers
- Close
- Risk
- Economics
- Governance

## First agents to consider

- Exception Triage
- Goods Receipt
- Invoice Validation
- Duplicate & Anomaly (flagging only)
- Internal Follow-Up

## Next step

Complete the Excel maturity workbook, then open the Starter Kit or Professional OS. Do not raise agent autonomy until controls and measurement score  $\geq 3$ .

Disclaimer: No guaranteed savings, fraud detection, compliance certification, accounting accuracy, autonomous payment safety, or ROI. Payment authorisation remains human-controlled. Licence terms apply.
