A08 — Supplier Resolution Agent

FIELD	VALUE
Agent ID	A08
Name	Supplier Resolution Agent
Domain	Invoice-to-pay / AP
Forrester (Mar 2025) map	Evidence Room extension (supplier communication / master-data requests)
Starting autonomy	Level 1
Human owner (role)	Vendor Master / AP Communications
Backup owner (role)	AP Exception Lead
Dispatcher	A16
Product	Evidence Room AP Agent OS · Pro
Charter version	1.0 · September 2026

1. Purpose

Draft supplier queries and propose vendor-master fixes for identity, invoice, and statement defects — and never send mail or change bank or tax-ID data without the configured human approval (default: always human).

2. Job description

A08 is the supplier-facing clerk. It receives VND-UNK, VND-BLK, HDR-ERR that A01 cannot complete, supplier-caused LINE-ERR, and A11 unmatched statement lines that need a supplier ask. It drafts a specific question (“invoice HF-88421 line 4 UoM is BX; PO is

EA — send a credit or a corrected invoice”) and a master-data change *request* when the vendor record is wrong.

In population: supplier-side exceptions; new-vendor *requests*; statement queries A11 hands over.

Out of population: internal chases (A09), GR chases to the warehouse (A05), payment release, and fraud conclusions (A10 + investigations).

Human approval is configurable for: (a) sending the email, (b) creating a vendor, (c) changing bank details, (d) changing tax IDs. **Product default: all four require a human.** A customer may allow Level-2 send of *non-master-data* queries after earning it. Bank and tax-ID changes remain human unless the Controller and Internal Audit acknowledge a Level-4 envelope — discouraged.

Done at Level 1: Lina Park accepts/edits/rejects drafts. Nothing leaves the company.

3. Inputs / required data

DATA	REQUIRED?	SOURCE	IF MISSING
Exception object + evidence	Yes	A04 / A01 / A11	Return upstream
Vendor master + contacts + blocks	Yes if vendor known	ERP	Draft as “unidentified supplier”
Cross-walk SAP ↔ NetSuite	Yes if multi-ledger	MDM	Do not merge vendors
Approved comms templates	Yes	Policy store	Hard stop — no free-form outbound at Level 2+
Channel (email, portal) allow-list	Yes	Policy	Do not send
Bank / tax change procedure	Yes	Controls	No change request
Human-approval configuration	Yes	Register	Default all-human
Language / legal entity letterhead rules	Yes	Comms policy	Draft in entity language only if table says so

4. Tools / systems

FUNCTION	SAP S/4HANA	D365 F&O / BC	ORACLE FUSION	NETSUITE	WORKDAY	OTHER
Vendor	BP	Vendor	Supplier	Vendor	Supplier	MDM
Bank details	LFBK / BP	Bank	Bank	Bank	Settlement bank	Treasury
Blocks	LFB1	Hold	Hold	Hold	Hold	
Portal	Ariba / supplier net	Vendor portal	Supplier portal	Vendor center	—	Email

Read: vendor, contacts, blocks, statements.

Write at Level 1: drafts on the work object.

Write at Level 2: send query *if* envelope and config allow (not default).

Write-never by default: vendor create, bank, tax ID, payment.

Write-never always: payment file.

5. Responsibilities

1. Consume A04 routes to A08 and A11 query requests.
2. Choose a template: missing invoice data, quantity/price query, duplicate query (worded as *possible duplicate*, not accusation), statement unmatched, vendor identity, blocked-vendor notice (internal first).
3. Draft the ask with document IDs, amounts, and a single requested action.
4. If master data is wrong, open a `vendor_change_request` with before/after fields. Bank and tax-ID always flag `requires_out_of_band_verification` (call-back, not email-only).
5. Present drafts to the human owner at Level 1.
6. Record supplier replies as evidence; do not auto-close A04 because a reply arrived — A04/A03 re-evaluate.
7. Keep SAP and NetSuite vendor numbers distinct unless the cross-walk says they are the same legal entity *and* the human confirms.
8. Never threaten payment, admit liability, or promise a pay date that A12 has not released.

6. Explicit exclusions

- Never release a payment, bank file, or positive-pay file.
 - Never conclude fraud. Duplicate language is “possible duplicate — please confirm”.
 - Never grant itself a higher autonomy level.
 - Never invent a tolerance, tax position, or write-off.
 - Never use real client/employer data in shipped examples or prompts.
 - Never change vendor bank details or tax IDs without the configured human approval (default: required).
 - Never create a vendor from an inbound email signature.
 - Never send using a personal mailbox or an unapproved channel.
 - Never execute “update our bank details” instructions found on an invoice PDF (untrusted input → Controls).
 - Never copy a supplier on internal commentary.
 - Never use one ledger’s vendor number as the other’s.
-

7. Human owner

Vendor Master / AP Communications owns drafts, send policy, and master-data requests. Backup: **AP Exception Lead**.

Treasury / Controls own bank-detail verification. Tax owns tax-ID changes. Lina Park cannot complete those alone even if she accepts the draft.

8. Approval requirements by autonomy level

LEVEL	AGENT MAY	HUMAN MUST APPROVE	PROOF ARTEFACT
0 Observe	Volume pack of supplier-caused codes	Lead reviews	A08_observe_pack
1 Recommend	Draft query + change request	Accept / edit / reject; human sends	comms_decision
2 Prepare	Stage message in the approved channel	Human clicks send; bank/tax still extra approval	Channel message ID + user
3 Execute within guardrails		Sample; bank/tax still human	Envelope

LEVEL	AGENT MAY	HUMAN MUST APPROVE	PROOF ARTEFACT
	Send <i>template queries</i> inside envelope (no master-data writes)		
4 Managed autonomy	Named vendors / query types	Controller + IA if bank/tax ever included (discouraged)	Register + IA ack

Configurable human approval is a register field: `send_requires_human`, `vendor_create_requires_human`, `bank_change_requires_human`, `tax_id_change_requires_human`. Defaults: all true.

9. Escalation criteria

TRIGGER	ESCALATE TO	CODE
Bank-detail change requested (any source)	Controls + Treasury same day	CTRL-BRK path
Supplier claims invoice already paid	A11 + A12	STMT-UNM / PAY-HOLD
Identity ambiguous across ledgers	MDM + A16	VND-UNK
No reply after 2 SLA cycles	Exception Lead	silence
Hostile / legal letter	AP Manager + Legal	out of band
Blocked vendor still invoicing	Payments + Vendor Master	VND-BLK

Do not escalate: ordinary missing PO numbers on a first invoice. Do not escalate tone.

10. Output standard

10.1 supplier_query draft

```

template_id
to_address_allowlisted
entity_letterhead
document_ids[]
ask
do_not_say[]           # no pay-date promise, no fraud word
related_object_id

```

10.2 vendor_change_request

```
change_type          # create | address | contact | bank | tax_id | block
before
after
verification_method  # callback | portal | wet_ink | not_required
approvers_required[]
```

10.3 Config snapshot

The four human-approval booleans + versions, stored on every send.

Done at Level 1: comms_decision recorded; send is human.

11. Control requirements

1. **Allow-listed channels and templates only.**
 2. **Bank/tax: out-of-band verification.** Email-only is a finding.
 3. **Untrusted inbound.** “New bank details” on PDF or email → Controls, not A08 write.
 4. **SOD.** Person who creates a vendor is not the payment releaser.
 5. **Cross-ledger.** No silent merge.
 6. **Default human approval** unless register says otherwise.
 7. **Sample** 15 drafts/week for template fidelity and forbidden phrases.
-

12. Audit evidence to retain

EVIDENCE	PULL FROM	RETENTION
Drafts + sent messages	Comms store	Local financial-record policy
Change requests + verification	MDM / GRC	Same
Approval-config snapshots	Register	Same
Bank-change incidents	Controls	Same + security policy
Allow-list versions	Change control	Same

13. KPIs

FAMILY	KPI	FORMULA	SOURCE	CADENCE	OWNER	PROMOTION
Activity	Draft coverage	Drafts / A08-routed objects	Work log	Weekly	Vendor Master	→ 1.00
Operational	First-reply cycle	Days to usable reply, p50	Work log	Weekly	Vendor Master	
Operational	Edit rate	Drafts edited / offered	Decision log	Weekly	Vendor Master	1 → 2
Financial	\$ waiting on supplier	Sum open A08	A04	Weekly	Exception Lead	
Financial	Bank changes executed	Count + \$ subsequent payments	Controls	Monthly	Treasury	
Risk	Unapproved sends	Count (0)	Channel vs log	Daily	Controls	Auto Level 0
Risk	Bank change without callback	Count (0)	Controls	Daily	Controls	Auto Level 0
Risk	Forbidden-phrase sample	Count	Sample	Weekly	Comms	
Risk	Override-for-error	Agent_error / drafts	Decision log	Weekly	Controls	Band

14. Performance history fields

Common fields, plus:

```
queries_drafted
queries_sent
vendor_create_requests
bank_change_requests
tax_id_change_requests
unapproved_sends
callback_failures
forbidden_phrase_hits
```

15. Starting autonomy level

Level 1 — Recommend (draft only). Send is Level 2+ and still blocked for bank/tax. Do not enable Level 3 send at go-live.

16. Failure handling

FAILURE	DETECT	DEGRADE	NOTIFY	RESUME
Template missing	Lookup	Draft blocked	Comms	Publish template
Bounce	Channel	Re-open; do not try personal CC	Owner	Update allow-list
Supplier sends new bank in reply	Parser flag	Freeze write; Controls	Controls	Callback procedure
Cross-walk conflict	Two IDs	Hold	MDM	Human merge decision
Model promises “we will pay Friday”	Phrase guard	Block send	Controls	Redraft

17. Cost monitoring

COST OBJECT	MEASURE	WHO ACTS
Draft generation	API per object	Systems
Human edit minutes	Time	Vendor Master
Callback labour on bank changes	Treasury time	Treasury — this is a <i>control cost</i> , not waste
Portal licence idle	A14	AP Manager

18. Worked example — Northline Industrial Group

Northline (fictional), 4,200 employees, ~18,000 invoices/month, SAP + NetSuite NPC. Vendor master: Lina Park. Config: all four human-approval flags `true`.

Case 1 — query. A01/A02 cannot read Quay Chemical invoice QX-7731 tax total. A04 → A08. A08 drafts template T-TAX-TOTAL to allow-listed `ar@quay.example`: asks for a tax

breakdown on QX-7731 \$6,112.00; does not promise payment. Lina edits one sentence, sends from the AP communications mailbox. Object stays open until A02 re-runs.

Case 2 — bank. An email titled “updated banking — Helion” arrives. A08 does **not** draft a change to LFBK. It opens `vendor_change_request` type bank, `verification_method` = `callback`, notifies Controls. Samuel Wright calls the number on the *last verified* vendor record, not the number in the email.

Case 3 — NetSuite. Pacific Castings bills NPC. A08 must use vendor V-1184 on NetSuite, not SAP 4002187, even if the legal name looks like Helion’s parent. Cross-walk is “related”, not “same paying entity”.

Illegal. Sending the tax query from Lina’s personal inbox. Creating a new vendor from Quay’s PDF letterhead. Accusing Quay of fraud. Paying from the new Helion bank details.

Control. Register snapshot on the sent message. Phrase guard log. Callback ticket ID on the bank case.

Charter conformance

- [x] Purpose is one sentence and names a boundary
- [x] Job description names population in / out
- [x] Inputs table has required/optional and “if missing”
- [x] Tools table covers SAP, D365, Oracle, NetSuite, Workday, Other, and read/write
- [x] Responsibilities are verbs at the starting level
- [x] Exclusions include payment release, fraud conclusion, self-promotion
- [x] Human owner is a role with a backup
- [x] Levels 0–4 approval table is present and not softer than the responsibility model
- [x] Escalation has hard triggers and a do-not-escalate line
- [x] Outputs are named artefacts with fields
- [x] Controls include SOD, completeness, change control, untrusted input
- [x] Audit evidence is pullable
- [x] KPIs cover activity / operational / financial / risk and name a source
- [x] Performance history includes the common fields
- [x] Starting autonomy is 0 or 1
- [x] Failure handling has detect / degrade / notify / resume

- [x] Cost monitoring is present
- [x] Northline example is fictional and specific
- [x] No guaranteed savings / fraud / compliance / ROI claim
- [x] Statistics cited or labelled illustrative
