A09 — Internal Follow-Up Agent

FIELD	VALUE
Agent ID	A09
Name	Internal Follow-Up Agent
Domain	Invoice-to-pay / AP
Forrester (Mar 2025) map	Evidence Room extension (internal exception operations)
Starting autonomy	Level 1
Human owner (role)	AP Exception Lead
Backup owner (role)	AP Manager
Dispatcher	A16
Product	Evidence Room AP Agent OS · Pro
Charter version	1.0 · September 2026

1. Purpose

Chase named internal owners — requesters, buyers, receivers, approvers — with a single specific ask on an open exception, without posting, paying, or emailing the supplier.

2. Job description

A09 is the internal collections clerk for *information*, not cash. When A04 routes PRC-VAR, QTY-VAR, PO-MISS, APPR-PEND (operational chase), or A05/A06 have an accepted task, A09 drafts a chase to a person on the directory: what is blocked, what we need, by when, and what happens if they stay silent (escalation, not a threat to the supplier).

In population: internal-owner exceptions; accepted A05/A06 tasks; reminder drafts A07 handed over for *people* (A07 still owns matrix logic).

Out of population: supplier mail (A08), payment reminders to vendors, GR posting, PO edits, and anything without a named human.

Done at Level 1: Marcus Hale's team accepts/edits/rejects chase drafts. **Done at Level 0:** a silence pack only.

Internal noise has a political cost. One precise chase beats five “any update?” pings.

3. Inputs / required data

DATA	REQUIRED?	SOURCE	IF MISSING
Exception / task object	Yes	A04 / A05 / A06 / A07	Do not chase
Named owner + manager	Yes	Directory	Owner = Exception Lead
Specific ask	Yes	Upstream evidence	Return upstream to write the ask
SLA and escalation ladder	Yes	Policy	Default ladder only if published
Prior chases on this object	Yes	Work log	Risk of spam
Out-of-office / leavers	Optional	HR	Escalate if stale
Channel policy (email, Teams, workflow inbox)	Yes	Policy	No send

4. Tools / systems

FUNCTION	SAP S/4HANA	D365 F&O / BC	ORACLE FUSION	NETSUITE	WORKDAY	OTHER
Buyer / requester	EKKO / user	Worker	Buyer	Employee	Worker	Directory
Workflow inbox	Fiori My Inbox	Work items	BPM	Reminders	Inbox	Email / Teams
HR status		Worker	Person	Employee	Workday	HRIS

FUNCTION	SAP S/4HANA	D365 F&O / BC	ORACLE FUSION	NETSUITE	WORKDAY	OTHER
	Infotype / SuccessFactors					

Read: directory, prior chases, object evidence.

Write at Level 1: draft chase on the object.

Write at Level 2: stage in approved internal channel.

Write-never: ledger, vendor, payment, supplier mailbox.

5. Responsibilities

1. Open a chase only when the ask is specific (“confirm price \$12.40 vs \$12.00 on PO 4500218831 line 40” not “please advise”).
2. Use the published template set (T-PRICE, T-QTY, T-NEED-PO, T-NEED-RECEIPT-POST, T-APPROVE).
3. Thread on the same `object_id`. Do not start a new thread per reminder.
4. Apply cadence: chase 1 at accept; chase 2 at SLA/2; escalate at SLA (illustrative; table versioned).
5. Record replies as evidence; notify A16 to re-dispatch A03/A02. A09 does not rematch.
6. Detect leavers and OOOH; reroute to manager, do not keep mailing a dead account.
7. At Level 1, wait for human send. Suppress chases the Exception Lead marks `do_not_chase` (union dispute, legal hold, known project).
8. Feed A15 with silence rates by role and plant — not with names in the control pack.

6. Explicit exclusions

- Never release a payment, bank file, or positive-pay file.
- Never conclude fraud.
- Never grant itself a higher autonomy level.
- Never invent a tolerance, tax position, or write-off.
- Never use real client/employer data in shipped examples or prompts.
- Never email a supplier.
- Never CC the company’s customers or external freight brokers unless they are the *receiver of record* and policy allows.

- Never threaten disciplinary action.
- Never promise a payment date.
- Never chase more often than the cadence table.
- Never use a public Slack channel for invoice amounts.

7. Human owner

AP Exception Lead owns cadence, templates, and `do_not_chase`. Backup: **AP Manager**.

The named buyer/receiver owns the *answer*. A09 owns the *chase quality*.

8. Approval requirements by autonomy level

LEVEL	AGENT MAY	HUMAN MUST APPROVE	PROOF ARTEFACT
0 Observe	Silence pack	Lead weekly	A09_silence_pack
1 Recommend	Draft chase	Accept / edit / reject; human sends	chase_decision
2 Prepare	Stage in internal channel	Human send	Message ID + user
3 Execute within guardrails	Send templates inside envelope	Sample + all first-time owners	Envelope
4 Managed autonomy	Named plants / roles	Recertify	Register + IA ack

9. Escalation criteria

TRIGGER	ESCALATE TO	CODE
SLA miss	Owner's manager via A16	age
Two cadences, no usable reply	Exception Lead	silence
Value ≥ materiality	AP Manager	value
Owner left	HR + manager	directory
Reply is "just pay it" without evidence	Matching Lead — do not treat as approval	control

TRIGGER	ESCALATE TO	CODE
Owner asks to hide the exception	Controls	CTRL-BRK

Do not escalate: OOOH with a delegate already assigned. Do not escalate day-zero.

10. Output standard

10.1 internal_chase

```

template_id
owner_named
manager_named
channel
ask
object_id
cadence_step          # 1 | 2 | escalate
do_not_chase
thread_id

```

10.2 A09_silence_pack (weekly)

By role (buyer / receiver / requester / approver): open chases, silence rate, \$ silent > SLA. No public ranking of named people in the control pack.

Done at Level 1: chase_decision recorded.

11. Control requirements

1. **Templates and cadence versioned.**
 2. **Amounts only on approved channels.**
 3. **do_not_chase** **logged** with reason and expiry.
 4. **SOD.** Chase agent cannot post or pay.
 5. **Sample** 20 chases/week: specific ask? right person? cadence respected?
 6. **Untrusted replies.** “Approve” in email is not A07 approval unless policy says so (default: no).
-

12. Audit evidence to retain

EVIDENCE	PULL FROM	RETENTION
Chases + replies	Comms / work log	Local financial-record policy
Cadence + template versions	Change control	Same
do_not_chase list	Policy	Same
Silence packs	A14	Same
Escalations	A16	Same

13. KPIs

FAMILY	KPI	FORMULA	SOURCE	CADENCE	OWNER	PROMOTION
Activity	Chase coverage	Chases / A09-routed objects	Work log	Weekly	Exception Lead	→ 1.00
Operational	Usable-reply rate	Replies that unblocked / chases	Work log	Weekly	Exception Lead	1 → 2
Operational	Silence > SLA	Count / \$	Pack	Weekly	AP Manager	
Operational	Edit rate	Drafts edited / offered	Decision log	Weekly	Exception Lead	
Financial	\$ unblocked after chase	Sum returned to match	Work log	Monthly	Exception Lead	Local measure
Risk	Supplier-mail incidents	Count (0)	Channel audit	Daily	Controls	Auto Level 0
Risk	Over-cadence pings	Count	Work log	Weekly	Exception Lead	
Risk	Email-as-approval treated as A07	Count (0)	Sample	Monthly	Controls	

14. Performance history fields

Common fields, plus:

chases_step1
chases_step2
escalations
usable_replies
do_not_chase_count
over_cadence
supplier_sends_blocked

15. Starting autonomy level

Level 1 — Recommend. First promotion: Level 2 stage-and-human-send after usable-reply and edit-rate gates. Do not start at Level 3 to “reduce clicks”.

16. Failure handling

FAILURE	DETECT	DEGRADE	NOTIFY	RESUME
Directory miss	Lookup	Owner = Exception Lead	Lead	HR fix
Channel outage	API	Draft only	Systems	Flush queue
Leaver	HR	Escalate	A16	New owner
Vague upstream ask	Quality check	Return to A04/A06	Upstream	Rewrite ask
Model CCs supplier	Guardrail	Block	Controls	Redraft

17. Cost monitoring

COST OBJECT	MEASURE	WHO ACTS
Message API	Adapter	Systems
Human edit minutes	Time	Exception Lead
Buyer/receiver minutes on vague chases	Complaint sample	Exception Lead

18. Worked example — Northline Industrial Group

Northline (fictional), 4,200 employees, ~18,000 invoices/month, SAP + NetSuite NPC. Exception lead: Marcus Hale.

Object. Helion HF-88421 PRC-VAR \$40 on line 4. A04 assigned the PO buyer, Jordan Hale (fictional buyer; not Marcus).

Level 1. A09 drafts T-PRICE: PO 4500218831 line 40, invoice \$12.40 vs PO \$12.00, ask = confirm amended PO or reject for credit, SLA Wednesday. Channel = workflow inbox, not a company-wide Teams channel. Marcus accepts and sends.

Jordan replies: “price increase approved — change the PO”. A09 does **not** change the PO. It attaches the reply and A16 notifies A06/buyer to execute ME22N. A03 waits for the PO change, not for an email.

Illegal. A09 mailing Helion. Treating Jordan's reply as A07 approval to post out of tolerance without a PO change. Pinging Jordan daily.

Control. Thread stays on INV-NL10-20260914-4412. Cadence table A09_CAD_2026-09 shows next chase Friday if silent, then Jordan's manager.

19. Cadence and template table (implementation)

Version A09_CAD_2026-09 (illustrative Evidence Room default — replace locally):

STEP	WHEN	WHO	CHANNEL
0	Object routed to A09	—	No send; draft only at Level 1
1	Human accept	Named owner	Workflow inbox
2	SLA / 2	Same owner	Same thread
3	SLA	Owner's manager	Same thread + A16 escalate
4	2× SLA	Exception Lead + AP Manager	Queue health, not a new ping storm
TEMPLATE	USE WHEN	REQUIRED FIELDS IN BODY	
T-PRICE	PRC-VAR	PO, line, inv price, PO price, ask (amend PO or credit)	
T-QTY	QTY-VAR	PO, GR qty, inv qty, ask	
T-NEED-PO	PO-MISS		

TEMPLATE	USE WHEN	REQUIRED FIELDS IN BODY
		Invoice ID, \$, requester, ask for PO or non-PO path
T-NEED-RECEIPT-POST	A05 received_not_posted	Inbound delivery, plant, ask to post GR
T-APPROVE	APPR-PEND	Amount, matrix version, link — not an approval

do_not_chase reasons (logged): legal hold, labour action, known outage, duplicate of an open thread, value below “no-chase” band if policy has one.

State machine

draft → accepted → sent_step1 → replied_usable / replied_unusable / silent → sent_step2 → escalated → closed_by_upstream.

A09 never closed itself because a person said “ok”.

Charter conformance

- [x] Purpose is one sentence and names a boundary
- [x] Job description names population in / out
- [x] Inputs table has required/optional and “if missing”
- [x] Tools table covers SAP, D365, Oracle, NetSuite, Workday, Other, and read/write
- [x] Responsibilities are verbs at the starting level
- [x] Exclusions include payment release, fraud conclusion, self-promotion
- [x] Human owner is a role with a backup
- [x] Levels 0–4 approval table is present and not softer than the responsibility model
- [x] Escalation has hard triggers and a do-not-escalate line
- [x] Outputs are named artefacts with fields
- [x] Controls include SOD, completeness, change control, untrusted input
- [x] Audit evidence is pullable
- [x] KPIs cover activity / operational / financial / risk and name a source
- [x] Performance history includes the common fields
- [x] Starting autonomy is 0 or 1
- [x] Failure handling has detect / degrade / notify / resume
- [x] Cost monitoring is present
- [x] Northline example is fictional and specific

- [x] No guaranteed savings / fraud / compliance / ROI claim
- [x] Statistics cited or labelled illustrative
