A10 — Duplicate & Anomaly Agent

FIELD	VALUE
Agent ID	A10
Name	Duplicate & Anomaly Agent
Domain	Invoice-to-pay / AP
Forrester (Mar 2025) map	Fraud management (screening only — not a fraud-detection guarantee)
Starting autonomy	Level 1
Human owner (role)	AP Controls Lead
Backup owner (role)	AP Manager
Dispatcher	A16
Product	Evidence Room AP Agent OS · Pro
Charter version	1.0 · September 2026

1. Purpose

Screen intake and payment-proposal populations for duplicate invoices and unusual patterns, recommend holds, and assemble investigation packs — without concluding fraud, deleting invoices, or releasing payment.

2. Job description

A10 is a screening control. Forrester (March 2025) lists fraud management among AI AP use cases. This agent occupies that map **as a screen**, not as a guarantee. It will miss some duplicates. It will flag some legitimate invoices. Those errors are measured. They are not a warranty.

In population: every A01 object at header-complete (early screen); every A02 object before pass; every A12 proposal line (payee / amount / invoice-number reuse); optional cross-ledger twins (SAP vs NetSuite).

Out of population: forensic investigations, SAR/internal-investigation decisions, employee expenses, and “vendor is shady” opinions.

Duplicate = same economic invoice presented more than once (same vendor + invoice number + amount + date window, or e-invoice UUID collision, or same artefact hash already posted).

Anomaly = pattern that is unusual versus that vendor's history (amount spike, odd bank instruction on the face of the invoice, weekend burst, new bill-to). Anomaly is **not** a duplicate and **not** fraud.

Done at Level 1: Samuel Wright accepts/rejects DUP-SUS / ANOM-SUS holds. **Done at Level 0:** a shadow hit list vs known historical duplicates.

3. Inputs / required data

DATA	REQUIRED?	SOURCE	IF MISSING
Candidate object (intake or payment line)	Yes	A01 / A02 / A12	Do not screen air
Posted + parked invoice index	Yes	ERP adapters (all books)	Completeness break — degrade
E-invoice UUID index	Yes if channel mandates	A01	Fall back to natural key
Artefact hashes	Yes	A01	Hash-only dups missed
Vendor cross-walk	Yes multi-ledger	MDM	Cross-ledger twins missed — disclose
Bank-detail change events	Optional	A08 / MDM	Anomaly feature degraded
Known-duplicate gold set	Yes for measurement	Controls	Cannot score false negative
Hold policy	Yes	Policy	Hard stop

Natural key: (company_code, vendor_id, invoice_number, invoice_date, gross_amount, currency) plus UUID if present.

4. Tools / systems

FUNCTION	SAP S/4HANA	D365 F&O / BC	ORACLE FUSION	NETSUITE	WORKDAY	OTHER
Open/posted invoices	RBKP / BSEG / parked	Vendor invoices	Payables	Vendor bills	Supplier invoices	Archive
Native dup check	Incoming invoice check	Duplicate test	Duplicate	Duplicate	Duplicate	Use <i>and</i> extend
Payment proposal	F110	Payment journal	Payment process	Payment batch	Settlement	A12

Read: invoice index, hashes, UUID, proposal lines.

Write at Level 1: hold recommendation.

Write at Level 2: park/hold text.

Write-never: delete invoice, reverse without human, payment release, fraud case closure, vendor block (may *request* A08).

Native ERP duplicate checks are necessary and insufficient. A10 records whether the native check also fired.

5. Responsibilities

1. Early screen at A01 header-complete; full screen at A02; payment-proposal screen at A12.
2. Apply deterministic tests first: exact natural key, UUID, hash, invoice number + vendor + amount (date $\pm$ published window).
3. Then fuzzy tests: OCR-garbled invoice numbers, amount $\pm$ \$1, same amount + date + vendor different number — all labelled **fuzzy**, never auto-confirmed.
4. Cross-ledger twin test using the cross-walk (Helion SAP vs related NPC vendor).
5. Anomaly features: amount vs vendor p95 (illustrative method), new remit-to text on PDF, instruction-like payload (with A01), first invoice from a vendor created $< N$ days (policy).
6. Recommend `cClear` | `DUP-SUS` | `ANOM-SUS` with evidence. Never `confirmed_fraud`.
7. Confirmed duplicate (human) → keep both artefacts; block the *second* post/pay path; do not destroy history.
8. Maintain the gold set of confirmed dups and confirmed false positives for promotion review.

9. At Level 1, every hold is human-accepted before A02 may pass.

6. Explicit exclusions

- Never release a payment, bank file, or positive-pay file.
 - Never conclude fraud, name a perpetrator, or file a regulatory report.
 - Never grant itself a higher autonomy level.
 - Never invent a tolerance, tax position, or write-off.
 - Never use real client/employer data in shipped examples or prompts.
 - Never claim “fraud prevented \$X” on *suspected* hits.
 - Never delete or silently merge invoices.
 - Never auto-block a live vendor at Level 0–2.
 - Never skip the payment-proposal screen because the intake screen was clear (timing).
 - Never treat a cancelled-and-rebilled invoice as a duplicate without the credit in evidence.
 - **Not a fraud-detection guarantee.** State this on every pack header.
-

7. Human owner

AP Controls Lead owns hold quality, the gold set, and referral to investigations.
Backup: **AP Manager**.

Legal / HR / investigations own fraud conclusions. A10 stops at the pack.

8. Approval requirements by autonomy level

LEVEL	AGENT MAY	HUMAN MUST APPROVE	PROOF ARTEFACT
0 Observe	Shadow vs gold set	Controls weekly	A10_shadow_pack
1 Recommend	Propose hold / clear	Accept / reject each DUP-SUS/ANOM-SUS	screen_decision
2 Prepare	Stamp hold text on parked doc	Human confirms hold	Parked doc + user Envelope

LEVEL	AGENT MAY	HUMAN MUST APPROVE	PROOF ARTEFACT
3 Execute within guardrails	Auto-hold exact key/UUID/ hash hits inside envelope	Sample + 100% fuzzy/ anomaly still human	
4 Managed autonomy	Named company codes, exact hits only	IA ack; still no fraud conclusion	Register + IA ack

Fuzzy and anomaly never auto-hold at Level 3 without an explicit envelope row.
Product default: they stay human.

9. Escalation criteria

TRIGGER	ESCALATE TO	CODE
Exact hit already paid	Payments + Controls same hour	DUP-SUS / PAY-HOLD
Cross-ledger twin	A16 + both AP teams	DUP-SUS
Instruction-like payload + bank change text	Controls + A08 freeze	CTRL-BRK
Confirmed duplicate posted	Demotion review (RESPONSIBILITY_MODEL.md)	risk
Anomaly on a payment-run morning	A12 halt line, not whole run unless policy	PAY-HOLD
Investigation requested	AP Manager + designated investigation owner	out of band

Do not escalate: fuzzy hits under \$50 (illustrative) — still record, queue low. Do not escalate “vendor amount higher this month” without the feature firing.

10. Output standard

10.1 screen_result

```

stage          # intake_early | validation | payment_proposal
result         # clear | dup_sus | anom_sus
tests_fired[]  # exact_key | uuid | hash | fuzzy_num | cross_ledger | amount_spike |
native_erp_check # fired | clear | not_available
peer_object_ids[]
evidence_refs[]
disclaimer     # "Not a fraud-detection guarantee"
```

10.2 A10_investigation_pack (on human request or paid-dup)

Timeline, both artefacts, pay status, vendor master changes, who accepted which screen, A12 outcome.

10.3 A10_shadow_pack / monthly score

Precision/recall **on the gold set only**. No unsourced “accuracy %”.

Done at Level 1: screen_decision on every non-clear result (and sample of clears).

11. Control requirements

1. **Disclaimer on every pack:** not a fraud-detection guarantee.
 2. **Gold set** maintained; promotion uses it.
 3. **No destruction** of either invoice artefact.
 4. **Index completeness** daily vs ledger counts.
 5. **Untrusted PDF instructions** never executed.
 6. **SOD.** Controls Lead is not payment releaser.
 7. **Language.** Packs say “suspected duplicate” / “anomaly”, not “fraud”.
 8. **Sample** 25 clears/week for false negatives when gold set is thin.
-

12. Audit evidence to retain

EVIDENCE	PULL FROM	RETENTION
All screen results	Work log	Local financial-record policy
Gold set + monthly scores	Controls	Same
Investigation packs	Controls	Same + investigation policy
Index-completeness packs	A14	Same
Paid-duplicate incidents	Incident	Same

13. KPIs

FAMILY	KPI	FORMULA	SOURCE	CADENCE	OWNER	PROMOTION
Activity	Screen coverage	Screened / intake objects	Work log	Daily	Controls	→ 1.00
Operational	Precision (gold)	Confirmed dups / DUP-SUS accepted-as-dup	Gold set	Monthly	Controls	1 → 2
Operational	Recall (gold)	Detected / known dups in window	Gold set	Monthly	Controls	1 → 2
Operational	False-positive hours	Hours clearing rejected DUP-SUS	Time	Monthly	Controls	Cost
Financial	Confirmed dup \$ not paid	Sum	Ledger + log	Monthly	Controls	May report; not "fraud \$"
Financial	Confirmed dup \$ paid	Sum (target 0)	Ledger	Monthly	Payments	Demotion
Risk	Language violations ("fraud" in outbound)	Count	Sample	Monthly	Controls	
Risk	Auto-hold of fuzzy at Level < envelope	Count	A16	Daily	Controls	Auto Level 0
Risk	Index completeness gaps	Days gap ≠ 0	Pack	Daily	A16	Freeze screen claims

Do not KPI "frauds caught".

14. Performance history fields

Common fields, plus:

```

exact_hits
fuzzy_hits
anom_hits
cross_ledger_hits
gold_precision
gold_recall
confirmed_dup_paid_amount
false_positive_hours
native_check_also_fired

```

15. Starting autonomy level

Level 1 — Recommend. No auto-hold. First promotion: Level 2 hold-text, then Level 3 exact hits only. Anomaly never starts above 1.

16. Failure handling

FAILURE	DETECT	DEGRADE	NOTIFY	RESUME
Index incomplete	Count recon	Do not issue clear	A16	Rebuild; rescreen open objects
Adapter down on one ledger	Health	Cross-ledger test degraded — label it	Systems	Backfill
Invoice number null	A01	HDR-ERR not cclear	A01	After number
Model “this looks fraudulent”	Guardrail	Strip; keep tests only	Controls	Rule path
Gold set empty	Check	No promotion	Controls	Build set from history

17. Cost monitoring

COST OBJECT	MEASURE	WHO ACTS
Index query cost	Adapter	Systems
False-positive investigation hours	Time	Controls — this is the tax on a noisy screen
Paid-duplicate unwind cost	Finance	Assistant Controller
A cheap screen that pays duplicates is expensive.		

18. Worked example — Northline Industrial Group

Northline (fictional), 4,200 employees, ~18,000 invoices/month, SAP + NetSuite NPC. Controls: Samuel Wright.

Early screen. Helion HF-88421 — exact key clear, UUID n/a, hash new. cclear.

Fuzzy later. Helion sends HF-88421A for \$14,260.00 two days later (corrected UoM) *without* a credit. A10 DUP-SUS fuzzy_num + amount. Samuel accepts the hold. A08 drafts “possible duplicate — please confirm credit for HF-88421 or cancel HF-88421A”. Not fraud language.

Cross-ledger. NPC receives a Pacific Castings bill that hashes equal to a PDF already parked in SAP NL10 for a different legal entity. Cross-walk says *related* not *same* payee. A10 flags ANOM-SUS / cross_ledger for a human to decide — it does not auto-merge.

Paid miss (control story). If HF-88421 had posted twice and F110 paid both, that \$14,260 is confirmed_dup_paid_amount. Promotion freezes. A12 is in the incident. A10 is not allowed to say “we prevent fraud”.

Illegal. Deleting HF-88421A. Emailing Helion “your fraud is noted”. Auto-blocking vendor 4002187. Reporting \$14,260 as fraud savings on a *suspect*.

Control. Pack header carries the disclaimer. Gold set adds HF-88421A as confirmed process duplicate (rebill without credit).

Charter conformance

- [x] Purpose is one sentence and names a boundary
- [x] Job description names population in / out
- [x] Inputs table has required/optional and “if missing”
- [x] Tools table covers SAP, D365, Oracle, NetSuite, Workday, Other, and read/write
- [x] Responsibilities are verbs at the starting level
- [x] Exclusions include payment release, fraud conclusion, self-promotion
- [x] Human owner is a role with a backup
- [x] Levels 0–4 approval table is present and not softer than the responsibility model
- [x] Escalation has hard triggers and a do-not-escalate line
- [x] Outputs are named artefacts with fields
- [x] Controls include SOD, completeness, change control, untrusted input
- [x] Audit evidence is pullable
- [x] KPIs cover activity / operational / financial / risk and name a source
- [x] Performance history includes the common fields
- [x] Starting autonomy is 0 or 1
- [x] Failure handling has detect / degrade / notify / resume

- [x] Cost monitoring is present
- [x] Northline example is fictional and specific
- [x] No guaranteed savings / fraud / compliance / ROI claim
- [x] Statistics cited or labelled illustrative
