

EVIDENCE ROOM

AP Agent OS — Professional

The operating system for AP agents: architecture, controls, KPIs, economics.

Tier 2 — US\$199

Version 1.0.0 · 2026-03-20

AI that earns responsibility.

Product definition

Evidence Room AP Agent OS — Professional is the complete operating system documentation set for building, governing, and measuring an AP agent workforce. It does not replace Tipalti, Coupa, Basware, Stamplic, Medius, HighRadius, SAP, Oracle, Microsoft, or other AP/ERP platforms. It designs the agent layer across them.

Architecture

- 16 detailed agent charters with exclusions, KPIs, and failure handling
- 5-level earned responsibility model (Observe → Managed autonomy)
- 10-step Observe-to-Expand methodology
- Full exception taxonomy with decision trees
- Governance framework and Agent Control Matrix
- KPI framework separating activity, operational, financial, and risk outcomes
- Business case / ROI calculator and agent economics
- Testing, UAT, shadow-mode, and pilot methodology
- Editable Excel, Word, and PowerPoint companions

Commercial test

Would a Finance Director responsible for 15,000 invoices per month willingly pay US\$199 because this saves days of research and supplies a credible implementation frame? The suite is built to that standard.

Evidence standard

Market claims are ledgered in 09_RESEARCH/RESEARCH_LEDGER.md. Customer-facing numbers prefer Ardent Partners 2024/2025 independent benchmarks and clearly separate illustrative examples from Evidence Room frameworks.

Price: US\$199 · Licence: Professional (one named user for professional work) — see legal pack.
