

EVIDENCE ROOM

AP AI Readiness Diagnostic

Score readiness. Find the first bounded agent. Demand evidence before autonomy.

Tier 0 — Free lead magnet

Version 1.0.0 · 2026-03-20

AI that earns responsibility.

Purpose

The AP AI Readiness Diagnostic helps Finance and AP leaders score their readiness to design governed AI agents across Accounts Payable. It is a lead magnet with executive utility — complete enough to start a Monday conversation after a Friday download.

How to use

- Score each of the 35 questions from 1 (absent/ad hoc) to 5 (continuously improved with evidence).
- Average scores by dimension: Process, Data, Controls, Technology, Skills, Governance.
- Map scores to maturity bands 1–5 and mark an opportunity heatmap.
- Select one bounded first-agent candidate — not a programme of sixteen.
- Capture baseline KPIs before any pilot.

Maturity bands

- 1 Initial — tribal knowledge; AI experiments unmanaged.
- 2 Emerging — some documentation; inconsistent ownership.
- 3 Structured — SOPs and RACI exist; measurement partial.
- 4 Managed — KPIs, controls, and change control operate.
- 5 Optimising — evidence-gated responsibility progression.

Industry context (not targets)

Ardent Partners State of ePayables 2025 (Bottomline distribution): average cost per invoice \$9.84; Best-in-Class \$2.65; exception rate 18.4%; straight-through processing 35.4%; AI adoption 44% with more than 75% expected within 12 months. Use as external climate only.

Ten-agent opportunity overview

- Invoice Intake, Validation, Matching, Exception Triage
- Goods Receipt, Approval, Supplier Resolution
- Duplicate & Anomaly indicators, Payment Proposal Review
- AP Manager / Orchestrator

Full question bank and Excel scorecard ship with the free package. Upgrade paths: Starter \$79 · Professional \$199 · Team \$499.
