

EVIDENCE ROOM

AP Transformation Blueprint

Productised assessment and 90-day agent workforce plan.

Tier 4 — US\$1,500–\$3,000

Version 1.0.0 · 2026-03-20

AI that earns responsibility.

Productised service

The AP Transformation Blueprint is a repeatable, AI-assisted service. The customer completes a structured intake. Evidence Room returns a current-state assessment, maturity score, opportunity map, recommended agent architecture, operating model, KPI baseline, controls frame, business case, roadmap, 90-day plan, and executive presentation.

Price band

US\$1,500–\$3,000 initially, scoped by entity complexity and invoice volume. Not open-ended consulting by the hour — a defined deliverable pack.

Fulfilment principles

- Intake questionnaire required before work starts
- No confidential employer data from Evidence Room authors enters client packs
- Human expert review of AI-assisted drafts before delivery
- Clear exclusions: we do not operate your payments or ERP

Application / checkout via Lemon Squeezy with manual fulfilment workflow.
