

EVIDENCE ROOM

AP Agent OS — Team Playbook

Workshop, facilitation, change, and steering for one working group

Proof before permission.

A transformation lead can take this into a room tomorrow and run a credible AP AI session. Outcome: charters, holds, shadow plan.
Non-outcome: a savings target or a platform shortlist.

Hard hold. ERP remains the system of record for accounting. Named humans remain the system of record for cash. Vendor-bank change and close attestation stay human. Duplicate & Anomaly flags are hypotheses, not fraud verdicts. This book is a method, not hosted software.

How to use this book

Buy Friday. Begin Monday. Do not charter from memory.

1. Score the free diagnostic (36 questions). Honour vetoes.
2. Map one path (usually PO-goods). Code exceptions from the closed list.
3. Charter Wave 1 at L0 or L1: Intake, Validation, Matching, Triage, Duplicate & Anomaly, Orchestrator.
4. Write the payment sentence on the wall. Agent 12 annotates; humans release.
5. Shadow before any write path. Promote only with an evidence pack.

Every page should answer at least one of: What should I do? How? Who owns it? What can go wrong? How do I control it? How do I measure it? What evidence proves it works?

Northline Industrials is a *fictional* manufacturer used so tables can be concrete (~15,000 invoices/month, Dynamics 365, Cleveland SSC). Figures are illustrative, not a client result.

Customer-facing statistics are limited to the research ledger. Do not paste vendor cost-per-invoice figures into a business case as targets.

Team — AP Agent OS

SKU: ER-TEAM · \$499 · Named organisation / working group

Lockup: EVIDENCE ROOM — AP AGENT OS

Job: One system for AP, Controls, Transformation, Treasury, and Audit to design the layer together.

Team includes the right to share the Professional artefacts inside the named working group, subject to the licence instrument. It does not permit resale, client republication, or a hosted service.

This folder is the facilitation and enterprise overlay. The method still lives in 01–03. Payment authorisation stays human. The toolkit still does not promise savings, fraud detection, compliance, accounting accuracy, or ROI.

Files

File	When to open
IMPLEMENTATION_PLAYBOOK.md	Multi-role sequence
FACILITATION_PACK.md	You are running a room
WORKSHOP_AGENDA.md	Tomorrow's full-day session
STAKEHOLDER_INTERVIEW_GUIDE.md	Before the workshop
PROCESS_OWNER_QUESTIONNAIRES.md	Owner homework
WORKSHOP_EXERCISES.md	Timed exercises
MATURITY_ASSESSMENT.md	Team-scored band
STEERING_COMMITTEE_TEMPLATES.md	Terms of reference and papers
IMPLEMENTATION_TRACKER.md	Workstream board
BENEFITS_REALISATION_TRACKER.md	Observed benefits only
TRAINING_MATERIALS.md	Role outlines
CHANGE_MANAGEMENT_TOOLKIT.md	Adoption without headcount theatre
EXECUTIVE_COMMUNICATION_TEMPLATES.md	Notes and town-hall
ENTERPRISE_GOVERNANCE_PACK.md	Multi-entity / multi-ERP

Suggested first week (Team)

1. Name the working group (≤ licence cap; confirm in the instrument).
2. Sit MATURITY_ASSESSMENT.md together (uses the free 36 questions).
3. Run WORKSHOP_AGENDA.md.
4. Stand steering from STEERING_COMMITTEE_TEMPLATES.md.
5. Load IMPLEMENTATION_TRACKER.md with Wave 1 only.

Field	Value
Toolkit	Evidence Room — AP Agent OS · Team
Object	Team pack README
Status	Edition 1.0.0

Implementation playbook — Team

Product: Evidence Room — AP Agent OS · Team

Audience: Working-group lead (usually Transformation + AP Process Owner)

Use: Coordinate several functions without turning the layer into a programme factory.

This playbook assumes Professional content is available to the group. Individual Starter users should not run a Team playbook on an Individual licence.

1. Working-group shape

Seat	Named person required	If vacant
Process Owner (Orchestrator A)	Yes	Do not start Wave 1
Controls Lead (Agent 10 A)	Yes	L0 only; no flag clearance path
Transformation / method	Yes	Files will not be applied
Match Lead	Yes for Agent 03	Charter 03 later
Ops / Intake	Yes for 01	
Payments / Treasury	Yes before Agent 12	Leave 12 closed
Audit observer	Requested	Note the decline; still sample internally
IT / IAM	Yes before L1	Stay L0

Northline (fictional): Marcus Chen (Process Owner), Elena Ruiz (Controls), Priya Shah (control design), Jordan Hale (Match).

2. Sequence (Team overlay)

Week	Play	Artefacts
–2	Interviews	Stakeholder guide
–1	Owner questionnaires back	Questionnaires
0	Full-day workshop	Agenda + exercises
1	Steering ToR signed; tracker opened	Steering templates
1–2	Map + charters	Professional process + charters
3–4	Instrument + L0	Testing packs
5	Day-30 observe	UAT / observer
6–12	L1 optional; weekly mix	KPI + meetings
13	Recertify	Autonomy gates

Weeks are illustrations. Close calendars win.

3. Decision rights in the group

Decision	Who	Not who
Path in Wave 1	Process Owner	Vendor
Payment sentence	Controller / Treasury	Transformation alone
Flag language	Controls	Marketing
Promote / demote	Steering (see ToR)	The model's confidence
I13 efficiency %	Finance if they insist on a model	Workshop vote
Headcount change	HR / business — out of this playbook	Agent economics

4. Workstreams (only four)

1. **Holds** — payment, bank, DOA, close.
2. **Path** — map, codes, five invoices.
3. **Charters** — six JDs.
4. **Instrument** — objects, access, ledger.

A fifth workstream called “value” or “ROI” is refused. Observed benefits go to `BENEFITS_REALISATION_TRACKER.md` after they exist.

5. Escalation

Symptom	Escalate to	Typical response
Vacant owner	Chair	Pause that agent
STOP incident	Chair + Controls same day	Freeze promotions
Function refuses the payment sentence	Chair	Do not implement
Function wants sixteen agents in week 2	Transformation	Roadmap; no
Legal / InfoSec block	Share human-vs-agent table	Redesign access; do not hide agents

6. Done for Team Wave 1

Same ten outcomes as `NINETY_DAY_PLAN.md`, plus: working group listed; ToR signed; tracker current; town-hall held with the payment sentence.

Field	Value
Toolkit	Evidence Room — AP Agent OS · Team
Object	Implementation playbook
Status	Edition 1.0.0

Facilitation pack

Product: Evidence Room — AP Agent OS · Team

Audience: Person running the room (Transformation lead or external facilitator using a Team licence)

Use: Set up and run the workshop and the follow-on working sessions.

You can run tomorrow if: invitees are booked, five redacted invoices are printed, last payment-run printout exists, and the payment sentence is on a wall.

1. Room

- Board or paper: **Proof before permission. Payment authorisation stays human.**
- Printed: human-vs-agent wall card; exception starter list; Wave 1 table.
- Do not project a savings model.
- No vendor on the attendee list for the full day. Optional 20 minutes at the end if the Chair insists — after refusals are written.

Materials: sticky notes, printed exercise sheets from `WORKSHOP_EXERCISES.md`, timer, name cards with *roles* (not just names).

Virtual: same artefacts in a shared folder the organisation owns. Breakout rooms for exercises 2 and 4. Do not paste live invoices into a consumer model.

2. Invite (copy)

Subject: Full-day AP agent layer workshop — design, not a demo

We will diagnose the layer we have, classify real exceptions and a payment run, and draft Wave 1 charters at observe/recommend. We will not select a platform, set a savings target, or authorise autonomous payments. Bring last quarter's volume, ten parks, and the last payment procedure.

Toolkit: Evidence Room — AP Agent OS.

Required: Process Owner, Controls, Transformation, Match, Ops, Payments or Treasury.

Strongly invited: Controller (at least afternoon), Audit observer, IAM.

Optional: Buyer, warehouse liaison (exercise 3).

3. Facilitator rules

1. If a participant says “we’ll save X,” write it on a *parking* page labelled **not a decision**.
 2. If someone says “detect fraud,” correct to “flag a hypothesis.”
 3. If a demo story auto-releases cash, stop the room and run class A.
 4. Timebox. Unfinished charters become homework, not a reason to skip holds.
 5. You do not vote. You keep the method.
-

4. Pre-reads (30 minutes max)

- `00_READ_ME/README.md` (Friday–Monday)

- Human-vs-agent wall card
- This organisation's diagnostic if already sat

Do not send the sixteen specs as pre-read. They will not be read.

5. Parking lot tags

Tag	Meaning
HOLD	Control issue — must resolve before L1
PATH	Mapping later
VENDOR	Feature to refuse or file
MONEY	Model later; not today
PEOPLE	Hours / backup

6. After the day

Same evening: type the decision list, owners, and STOP language. Load the tracker. Book steering. Send the Controller the Board/CFO page if they were absent.

Status	Edition 1.0.0

Full-day workshop agenda — AP AI transformation (layer design)

Product: Evidence Room — AP Agent OS · Team

Duration: 08:45–16:30 (one day)

Outcome: Maturity sentence, hold status, classified work, six draft Wave 1 charters, two-week shadow plan, steering date.

Non-outcome: Platform shortlist, savings target, fraud programme, L3 design.

A leader can run this tomorrow with `FACILITATION_PACK.md` and `WORKSHOP_EXERCISES.md`. Northline column in exercises is the answer key for the facilitator, fictional.

08:45–09:00 · Arrive and wall

Participants write their role on a card. Facilitator posts the two sentences. No opening video.

09:00–09:20 · Contract of the day

Min	Talk
5	What this is: operating system for an agent <i>layer</i> . Keep the stack.
5	What this is not: ERP project, payment product, prompt class.
5	Payment sentence. Ask Treasury to repeat it.
5	Banned claims (savings guarantee, fraud detection, compliance, accuracy, autonomous pay).

Check: Everyone can say “prepare is not execute.”

09:20–10:20 · Exercise 1 — Diagnostic lightning (team score)

Use `MATURITY_ASSESSMENT.md` / 36 questions. Score as a room. Challenger is Controls.

Output: Six dimension averages, vetoes, band sentence on the wall.

Break rule: If C1 is disputed, do not average — reconstruct the last payment run after the break.

10:20–10:35 · Break

10:35–12:00 · Exercise 2 — Ten exceptions + one payment run

Sheets from `WORKSHOP_EXERCISES.md`. Groups of three (Match + Controls + Transformation; Ops + Payments + Process Owner).

Output: Class A–J table; list of demo temptations; at least one class A refusal written.

12:00–12:45 · Lunch

Controller joins if only afternoon.

12:45–13:15 · Holds review with Controller / Treasury

Walk C1, C2, dummy GR, DOA climb. Write **used / documented / absent**.

If C1 absent: afternoon charters are L0 only; Agent 12 card is marked CLOSED.

13:15–14:45 · Exercise 3 — Wave 1 charters

Six stations or two rounds of three. Use Starter JD. Facilitator rotates. Exclusions read aloud.

Output: Draft JDs for 01, 02, 03, 04, 10, 16 with owners (or VACANT).

14:45–15:00 · Break

15:00–15:40 · Exercise 4 — Shadow design

Coverage, sample sizes, language sample, rollback, operator huddle date.

Output: Two-week calendar.

15:40–16:10 · Exercise 5 — Steering and communications

ToR skim. Monday note. Who tells operators. Who tells Audit.

Output: Steering date; comms owners.

16:10–16:30 · Close

Read the wall: band, vetoes, owners, payment sentence, shadow start, STOP list.

Parking lot assigned.

Facilitator: “We did not set a savings target. That was on purpose.”

Timing if the Controller only has 45 minutes

Give them 12:45–13:15 and 16:10–16:30. Do not move holds to an email.

Timing if virtual

Same blocks. Exercises 2 and 3 in breakouts of 25 minutes + 10-minute plenary. Send packs the night before. Prohibit live invoice pasting into chats.

Homework (48 hours)

- Owners confirm they accept the JD.
 - IAM starts service-account request.
 - Informal helpers listed.
 - Tracker loaded (IMPLEMENTATION_TRACKER.md).
-

Workshop exercises

Product: Evidence Room — AP Agent OS · Team

Use: With WORKSHOP_AGENDA.md. Print or share these sheets.

Facilitator key: Northline answers are fictional illustrations, not a scoring key for the client.

Exercise 1 — Diagnostic lightning (60 min)

Setup. Six posters (Process, Data, Controls, Technology, Talent, Economics). Questions A1–F6 from the free diagnostic on cards.

Play. Room scores 0–4. Controls may veto a score by saying “artefact.” If none, score falls to 0–1.

Plenary (10 min). Compute averages. Apply veto caps. Write the band sentence.

Northline key (fictional): C6=0 informal copilots; C1=4; band L2 Informal activity.

Fail the exercise if: the room averages C1 with D2 to “smooth” a payment gap.

Exercise 2 — Ten + one (85 min)

Sheet columns: object · class A–J · modifiers · who decided · L1 ceiling · demo temptation · our refusal.

Group A: ten parks (bring your own; if missing, use the anonymised Northline ten below).

Group B: last payment proposal (or Northline Tuesday run illustration).

Northline ten (fictional, anonymised):

#	Situation	Class
1	Clean 3-way \$4,200 Dayton	C
2	Same + possible duplicate flag	H blocks C
3	Missing GR \$18,500 Birmingham	C + E
4	Service \$8,400, approver on leave	E / G
5	Supplier price \$12.10 vs \$11.40	F / G
6	PO exhausted	G
7	Tax field missing on CA invoice	G (Tax)
8	Wrong entity	C — do not switch entity
9	Free-text “urgent pay”	A if they mean release
10	UOM EA vs BOX	G + later J

Northline run (fictional): 612 lines, \$4.1m, two flags, one bank change yesterday → annotate holds; humans release.

Debrief. Each group reads one class A and one class H. Write the refusal minute.

Exercise 3 — Six charters (90 min)

Stations. 01, 02, 03, 04, 10, 16. JD template. 12 minutes per station if rotating; or 40 minutes × 2 rounds of three.

Required spoken line at each station: exclusions.

Vacant owner: write VACANT; do not assign “the SSC.”

Northline key: Agent 10 L0 Elena Ruiz; Agent 03 L1 Jordan Hale; Agent 16 Marcus Chen.

Exercise 4 — Shadow calendar (40 min)

Fill:

Day	Coverage action	Sample	Language	Owner minutes
1–10				

Rollback: one paragraph. Operator huddle date.

Constraint: if Match Lead hours = 0, Matching stays unchartered.

Exercise 5 — Comms and steer (30 min)

Draft in the room:

1. Monday note (no savings).
2. Operator huddle three bullets.
3. Audit observer invite.
4. Steering date + Chair.

Read the Monday note aloud. Strike any banned phrase.

Optional evening (if Chair demands “value”)

10 minutes. Open BUSINESS_CASE_STARTER.md. Do not populate I13 by applause.

Status	Edition 1.0.0

Stakeholder interview guide

Product: Evidence Room — AP Agent OS · Team

Use: 35-minute interviews in the two weeks before the workshop.

Rule: Ask for artefacts. Recollection without an artefact is scored later as 0.

Do not interview to build a business case. Interview to see work objects, holds, and informal helpers.

Shared opening (3 minutes)

I am mapping how invoices, exceptions, and payments move, and where any model or bot already touches them. I am not scoring your team. Payment release stays human. Please do not share live bank details. We can look at your screen.

Consent to notes. No production files to Evidence Room.

AP Operations / Intake

1. Show me yesterday's inbound. What share email / portal / XML / paper?
2. What becomes a work object today? What ID?
3. Walk one ugly PDF. Who keys what?
4. Any copilot or IDR "AI" on? Who owns the prompt?
5. When capture fails, where does it go?
6. What must never be guessed (PO, vendor, amount)?

Artefact: intake report or mailbox rule.

Matcher

1. Walk a 3-way. Where is the tolerance table?
2. Last dummy GR you heard about — what happened?
3. What do you do with an open possible-duplicate?
4. Multi-PO / multi-entity — in or out?
5. If the agent is wrong, how do you notice today?

Artefact: one worksheet or ERP match screen; tolerance table.

Exception desk

1. Export ten parks. Why these codes (or why free text)?
2. Aging — invoice date or park date?
3. Owner = person or "AP"?
4. Escalation clocks — written?
5. EX-OTH examples.

Artefact: queue extract.

Controls

1. Possible duplicates — register or email?
2. Four outcomes: clear / confirm / escalate / defer — exist?
3. Language on tickets today (“fraud”)?
4. Who clears high value?
5. Informal helpers you fear?

Artefact: any flag log; bank-change log (with Controls or Vendor Master).

Payments / Treasury

1. Reconstruct the last run: build / review / authorise / transmit.
2. Two humans — names of roles.
3. Has any tool ever offered auto-release? What did you say?
4. Discount expiry — who decides?
5. Positive Pay / bank file — who clicks?

Artefact: last proposal + approval evidence.

Vendor master

1. Last five bank changes — dual control?
 2. New vendor — who approves?
 3. Would you accept an agent-created vendor? (Expected: no.)
-

Plant / warehouse liaison

1. Missing GR — how are you chased today?
 2. Have you been asked to post a GR to match an invoice?
 3. What would a useful packet contain?
-

Buyer / procurement ops

1. Price mismatch — how do you accept?
 2. PO quality defects you already know?
 3. Agent 06 later: who would own it?
-

Controller / CAO (20 minutes)

1. What would you need to see at day 30?
 2. Is a savings target a condition of starting? (If yes, record — method will not write it.)
 3. Confirm payment and close attestation stay human.
 4. Audit observer — will you ask them?
-

IT / IAM

- 1. Service accounts for finance bots today?
- 2. Shared UI logins?
- 3. Change control for prompts?

Internal Audit

- 1. Will you observe packets (not operate)?
- 2. What reconstructability standard do you already use?
- 3. Any ban on models in finance?

Close (2 minutes)

Thank you. Workshop on [date]. We will not quote you as supporting a savings number.

Process-owner questionnaires

Product: Evidence Room — AP Agent OS · Team

Use: Homework for named owners before the workshop. Return 48 hours prior.

Time: 25 minutes each.

Answers are design inputs. They are not attestations of compliance.

Questionnaire A — AP Process Owner (Orchestrator A)

1. Which path should Wave 1 use, and why that one (narrowness, not “value”)?
 2. Who is backup if you are out for two weeks?
 3. List every informal helper you know (copilot, RPA, vendor AI).
 4. What ID will we use for a work object on day 1 (even if a spreadsheet)?
 5. What is the Intake SLA you will sign (hours)?
 6. Will you pause an agent if its owner is vacant? (Expected: yes.)
 7. What must Internal Audit be able to reopen at day 30?
 8. Write the payment sentence in your own words.
-

Questionnaire B — Controls Lead (Agent 10 A)

1. Current possible-duplicate process — steps and system.
 2. Will you accept four outcomes only (clear / confirm / escalate / defer)?
 3. High-value threshold for your clearance (local DOA — do not copy Northline)?
 4. Language you will forbid on tickets.
 5. Hours per week you can give the register in month one.
 6. Any investigation function you must notify — name the policy, do not invent a fraud SOP.
-

Questionnaire C — Match Lead (Agent 03 A)

1. Match trees in force (attach table).
 2. Object types you will *exclude* from Wave 1.
 3. Sample size you can dual-review daily in L0.
 4. Last time someone force-matched — what should the SOP say?
 5. Backup matcher.
-

Questionnaire D — Operations Lead (Agent 01 A)

1. Source mix (best estimate + report name).
 2. Paper / image retrieval — where?
 3. Extract sampling today — yes/no.
 4. Out-of-scope document types (T&E, etc.).
-

Questionnaire E — Payments Lead / Treasury (Agent 12 gate)

- 1. Last run evidence (attach or describe).
 - 2. Do you agree Agent 12 stays annotate-only? Y/N
 - 3. Conditions under which you would *refuse* to open Agent 12.
 - 4. Who transmits the bank file?
-

Questionnaire F — Finance Transformation

- 1. Hours freed for method work in the next 90 days (yours and others').
 - 2. Will you refuse to write a savings target? Y/N
 - 3. Licence: who is on the named working group list?
 - 4. Custom Blueprint needed? Why / why not.
-

Return format

One page per questionnaire. Artefact names in footnotes. Vacant answers marked VACANT — do not politely guess.

Steering committee templates

Product: Evidence Room — AP Agent OS · Team

Companion: Professional EXECUTIVE_STEERING_PACK.md (agenda content). This file is the *institution*: ToR, papers, logs.

1. Terms of reference (adopt / tailor)

Name: AP Agent Layer Steering

Purpose: Commission, promote, demote, and refuse agents under Evidence Room — AP Agent OS method.

Non-purpose: Approve ROI, certify compliance, select ERP vendors, authorise payments.

Membership: Chair (Controller or delegate), Process Owner, Controls, Transformation, Payments/Treasury, IAM as needed. Audit: observer.

Quorum: Chair + Process Owner + Controls.

Voting: Promotions and Wave 2 open require quorum plus Treasury if payment-adjacent. Demotions can be executed by Controls + Process Owner and reported.

Cadence: Monthly from shadow start; day 30; day 90; extraordinary on STOP.

Papers: Decision log; register; incident log; cost ledger. No single-cell ROI paper.

Conflicts: Vendor attendees timeboxed after decisions.

Review of ToR: 12 months or on toolkit edition change.

Sign-off: Chair date _____.

2. Agenda paper header (every pack)

Field	Entry
Meeting	Steer # · date
Pre-read pages	≤ 8
Decisions asked	numbered
STOP incidents since last	
Autonomy changes proposed	none / listed
Savings paper attached?	Must be No

3. Decision log (columns)

Date · ID · Decision type (start L0 / promote / demote / retire / refuse / extend) · Agent · Class/objects · From → To · Evidence URI · Votes · Dissent · Effective date.

4. Incident log (columns)

Date · ID · Type (payment-adjacent / bank / language / silent scope / vacant owner / vendor) · Object · Immediate action · Owner · Closed date.

5. Refusal minute (paste)

See Professional steering pack §9. File under Decision type = refuse.

6. Chair’s opening (30 seconds)

We are here to withhold permission until proof exists. We will not set a savings target in this meeting.

Document control

Field	Value
Toolkit	Evidence Room — AP Agent OS · Team
Object	Steering committee templates
Status	Edition 1.0.0

Change-management toolkit

Product: Evidence Room — AP Agent OS · Team

Use: Adopt the layer without headcount theatre or “AI will replace you” messaging.

Not: A culture campaign. The change is decision rights and packets.

1. What is actually changing

Changes	Does not change
Work objects and coded parks	ERP as accounting SoR
Recommendations appear (at L1)	Who authorises payment
Sampling time is real work	Employment contracts (unless the org separately decides)
Informal copilots become visible	The need for specialists

Do not brief “efficiency” as the lead story. Brief **inspectability and withheld permission**.

2. Stakeholder map (fill)

Person	Role	What they fear	What we say	Owner of the conversation
	Specialist	Replaced / watched	You accept/reject; rejects are data	Process Owner
	Matcher	Forced to trust the model	You remain A on accept	Match Lead
	Controls	Fraud theatre	Flags are hypotheses	Controls
	Treasury	Silent release	Ceiling annotate	Chair
	Union / works council if any	Headcount	No headcount target in this method	HR + Chair
	Plant liaison	Nagging	Packets not nags	Wave 2 owner

3. Messages that are allowed

- Agents earn responsibility.
- You will see more recording before you see less keying.
- Payment is still yours (Treasury / Payments).
- We will demote what is expensive and wrong.

4. Messages that are forbidden

- “This will cut the team in half.”
- “The AI is more accurate than you.”
- “Don’t reject — you’ll break the ROI.”
- “We’re going touchless this quarter.”

- “It detects fraud so you don’t have to look.”

5. Resistance patterns and responses

Pattern	Response
“Just another transformation slide”	Do ten exceptions in the room
“We already have Copilot”	List it on the register; charter or off
“No time to sample”	Then no L1 — queue problem
“Vendor can turn on auto-post”	Refusal minute
“Give me a savings number to motivate staff”	Refuse; motivation by holds and packets

6. Rituals that help

- Operator huddle at L0 start.
- Weekly exception mix with *people* aging, not “the bot.”
- Public declined promotion (anonymised) — proves demotion is real.
- Thank-you for a good reject.

7. Headcount

This toolkit has no redundancy workstream. If the organisation later reallocates hours, that is a management judgement outside Evidence Room’s claims. Change comms must not preview a cut as a benefit of the licence.

Document control

Field	Value
Toolkit	Evidence Room — AP Agent OS · Team
Object	Change-management toolkit
Status	Edition 1.0.0

Training materials

Product: Evidence Room — AP Agent OS · Team

Use: Role-based outlines you can teach in short sessions.

Not: A certification programme. Completing training does not make an agent safe or an organisation compliant.

Deliver internally. Do not upload production invoices into a public model to “demo.”

1. Core module (all roles) — 40 minutes

Min	Content
5	Lockup, brand idea, keep the stack
10	Sixteen names; Wave 1 six
10	L0–L4; default L0/L1; payment ceiling
10	Packet minimum; flag ≠ fraud
5	STOP words; who to call

Check question: “Can Agent 12 release under \$5k if match is clean?” Correct answer: No.

2. Operator module — 45 minutes

- Shadow vs recommend.
- Accept / edit / reject.
- Incomplete packet stops.
- Dummy GR forbidden.
- How to reject without drama.
- Practice: three tickets with bait language.

Exercise: Rewrite “AI caught fraud, release the rest” into a lawful ticket.

3. Matcher module — 45 minutes

- Worksheet fields.
- Tolerance read-only.
- Open flag blocks match-recommend.
- Sample disagreement log.
- Charter caps (value, first invoice, entity).

4. Controls module — 45 minutes

- Four outcomes.
- Register hygiene.
- Language sample method.
- High-value clearance.

- Demotion right.

5. Payments / Treasury module — 30 minutes

- Three jobs: build (ERP), annotate (agent $\leq$ L2), authorise (humans).
- Discount is not a release criterion.
- How to read annotations.
- Incident if a file left without humans.

6. Owner / Process Owner module — 45 minutes

- Charter maintenance.
- Vacant owner = pause.
- Orchestrator fields.
- Cost ledger.
- Steering papers.

7. Audit observer briefing — 20 minutes

- What to reopen.
- You do not operate.
- You do not certify.
- Day-30 pack contents.

8. Leader / sponsor — 15 minutes

- Use `BOARD_CFO_SUMMARY.md`.
- Why there is no savings slide.
- Informal helpers are the first control action.

9. Attendance record

Date	Module	Names	Facilitator
------	--------	-------	-------------

Training attendance is not an autonomy gate. Gates are in `AUTONOMY_PROGRESSION.md`.

Use: Paste and edit. Strike anything you cannot evidence.

Related: 01_FREE_AP_AI_READINESS/BUSINESS_CASE_STARTER.md, BOARD_CFO_SUMMARY.md.

1. Monday note (post-workshop)

Subject: AP agent layer — Wave 1 at observe/recommend

We completed a one-day design workshop. Maturity reading: **[L# — name]**. Payment authorisation remains human ([procedure]). Vendor bank changes remain dual control.

Wave 1 agents and owners: [six lines]. Two-week shadow starts [date]. Operators will not rely on shadow output. Internal Audit is invited to observe packets on [day 30].

We did not set a savings target. We listed informal helpers: [list]. Success at 30 days is reconstructable packets, coded exceptions, flag outcomes, and an autonomy register — not cost-takeout.

Evidence Room — AP Agent OS is the method we used. It is not software and not a payment authority.

2. Operator town-hall (8 minutes spoken)

We are naming the helpers that touch invoices. For two weeks they only write a parallel record. You work as you do today. When — if — we show recommendations, you accept, edit, or reject. You will not be measured on agreeing with the model. Nobody in this programme authorises a payment except the people who already do. If a ticket says “fraud” or “the AI approved it,” rewrite it. Questions to [Process Owner].

3. Audit observer invite

Please observe, not operate, a sample of AP agent packets on [date]: five intake, five validation fails, five worksheets, the flag register, and the last payment run. We ask for reconstructability notes, not a certification. Flags are labelled as hypotheses. Payment release remains [procedure].

4. InfoSec / IAM request

We need least-privilege service accounts for [agents] to *read* [objects] and write evidence to [store]. No shared specialist login. No write to vendor bank fields. No payment-file transmit. Prompt changes via [ticket type]. This is not a request to connect Evidence Room to the ERP — we are not hosting.

5. Vendor / integrator reply (auto-release)

Thank you. Our method classifies payment release as human-only at every autonomy level. We will not enable auto-release under a dollar threshold. \$X is a human DOA limit. Please show annotate-and-hold instead. We will file this as a refusal if the feature cannot be disabled.

6. Quarterly update to the CAO

Register: [n] agents, all L0/L1. Promotions declined: [n]. STOP incidents: [n]. Layer cost per thousand invoices: [range]. Payment sentence still true. Observed operational rates (if locked): [or “not reported”]. No ROI claimed.

7. Identity footnote (use when the name confuses)

Evidence Room — AP Agent OS (evidenceroom.ai) is a Finance Agent Operating System toolkit. It is not Evidence Room LLC, the forensic-animation firm at evidence-room.net.

Document control

Field	Value
Toolkit	Evidence Room — AP Agent OS · Team
Object	Executive communication templates
Status	Edition 1.0.0

Enterprise governance pack

Product: Evidence Room — AP Agent OS · Team

Use: Overlay when there is more than one legal entity, country, ERP, or SSC pod.

Rule: A Dynamics path at L1 does not confer L1 on an Oracle path. New class, new L0 clock.

This overlay does not certify multi-entity compliance (tax, statutory, SOX). Local policy wins.

1. Objects that must be unique

Object	Enterprise rule
Charter	One per agent and object class (entity × doc type × match tree)
Autonomy register	One enterprise register with class as a column — no orphan copilots in a plant
Payment sentence	Same words everywhere; <i>procedures</i> may differ (local bank)
Exception codes	Core list shared; local codes prefixed EX-L0C- via change control
Work-object ID	Include company code / entity
Service accounts	Per ERP; no cross-ERP shared login

2. Hub and spoke

Hub (enterprise)	Spoke (entity / ERP)
Method, banned claims, Wave policy	Path map, tolerances, tax desks
Steering ToR	Local exception mix
Promotion gate <i>tables</i>	Promotion cases for that class
Agent 10 language	Local clearance thresholds
Toolkit edition	Local SOP IDs

Hub may **decline** a spoke promotion. Hub may not **grant** L3 over a spoke Controller's dissent on posting classes.

3. Multi-ERP

Topic	Practice
Mapping	Same sixteen roles; different field names
Orchestrator	May be one store with <code>source_system</code> or one store per ERP — pick one and write it
Connectors	Out of product scope. IAM and integration remain the organisation's
Vendor AI features	Register per ERP tenant
Wave 1	One ERP first

Do not write a common API client “because it is all REST.” Hosts differ.

4. Multi-country

Topic	Practice
Tax	Agent 02 flags fields; local Tax decides position
Language	Operator-facing output in the language of the SSC that acts
Payment	Local dual-control procedure; same human-only rule
Data residency	Packets stay in systems the organisation already approved — not Evidence Room
Works councils	Use change toolkit; no headcount story

5. Shared-service pods

If Cleveland and a second pod both touch the same entity, **one** Process Owner remains A. Two As is a design smell. RACI the pod as R, not A.

Northline (fictional): four company codes, one SSC, one Process Owner. Monterrey paper is a class, not a second OS.

6. Enterprise steering addenda

Add seats: tax lead (when CA/MX or equivalent in scope), a second ERP owner when Wave 10 extend starts. Keep quorum as Chair + Process Owner + Controls. Do not expand quorum until it cannot meet.

Papers: register filtered by class; incidents by entity. Still no ROI paper.

7. Extend checklist (new entity or ERP)

- [] Diagnostic dimensions B and D re-sat for that path.
- [] Holds tested on *that* bank file / *that* vendor master.
- [] Map and five invoices.
- [] New charters (do not photocopy dollars from another DOA).
- [] New L0 clock.
- [] IAM on that system.
- [] Hub notes the class on the enterprise register.

8. When to apply for Custom Blueprint

Use 05_CUSTOM_BLUEPRINT/ when: more than two ERPs in year one; a political split between SSC and plants; a recent acquisition with no map; or InfoSec will not accept the method without a facilitated design against *their* stack.

Disclaimer — Draft for Counsel

Status: Working draft. **Not legal advice.** Intended for /disclaimer, checkout footers, and the zip. Counsel must confirm jurisdiction-specific wording.

Last updated: 20 September 2026

Lockup: EVIDENCE ROOM — AP AGENT OS

If this Disclaimer conflicts with a marketing sentence, **this Disclaimer controls** and the marketing sentence should be removed.

1. Nature of the product

Evidence Room — AP Agent OS is a **digital method and toolkit**. It contains written architectures, charters, frameworks, and examples to help an organisation **design, govern, and discuss** an Accounts Payable agent layer.

It is **not**:

- software that connects to, posts to, or operates your ERP
 - a payment service, money-transmission service, or bank
 - an audit, assurance, or attestation engagement
 - legal, tax, accounting, or regulatory advice
 - a certification that you meet any law, standard, or control framework
 - a fraud-detection, AML, or sanctions-screening product
 - a guarantee of any financial or operational result
-

2. Outcomes we do not promise

Without limitation, we do **not** promise or guarantee:

- savings, cost reduction, or **ROI**
- **fraud detection**, fraud prevention, or the absence of duplicate or abusive payments
- **regulatory compliance** (including but not limited to SOX, VAT/GST rules, employment, or data-protection law)
- **accounting accuracy** or correct postings
- **autonomous payment safety**
- cycle-time reduction
- “touchless AP” as an operating state
- that any model you later use will be correct

Any number in the materials labelled illustrative, fictional, or Northline Industrials is **not** a benchmark and **not** a target.

3. Payment authority

The method states that **payment authorisation and release remain human**. That is a design rule in a document. It does not itself stop a person or a vendor from wiring a model to a payment file. **You** must implement holds in your systems and policies.

We are not liable for payments you or your agents release.

4. Implementation is yours

You choose vendors, models, prompts, permissions, owners, and whether to commission any agent. You are responsible for testing, sampling, access control, and local policy.

The toolkit cannot see your invoices unless **you** paste them somewhere. Do not paste production data to us.

5. No professional relationship

Using the site or the files does not create an attorney-client, auditor-client, fiduciary, or similar relationship. Blueprint facilitation, if any, is scoped method design, not an audit opinion.

6. Third parties and names

Mentions of ERP or AP vendors are descriptive. No sponsorship or compatibility certification is implied unless a written agreement says so (none at the time of this draft).

We are **not** affiliated with Evidence Room LLC (forensic animation / evidence-room.net). See Trademark notes.

Lemon Squeezy and Stripe are independent. Their MoR and payment terms are theirs.

7. Site content

Resources, charts, and posts are educational and commercial description. They are not advice to buy or refrain from buying any security or to take any tax position.

8. Limitation pointer

Liability, to the extent it can be limited, is addressed in the Terms. **Counsel must write that limit.** Nothing here is an additional warranty.

9. Short footer (site and checkout)

Evidence Room — AP Agent OS is a digital method and toolkit. It is not an ERP, payment service, audit, or compliance certification. It does not detect fraud, authorise payments, or guarantee savings, accuracy, or ROI. You remain responsible for implementation and for all payment decisions.

Counsel checklist

- ☐ Conform to mandatory consumer wording
- ☐ Harmonise with insurance if any
- ☐ Confirm “not advice” is not over-claimed in Blueprint sales calls
