

EVIDENCE ROOM

AP Transformation Blueprint

Productised assessment · structured intake · repeatable fulfilment

Proof before permission.

You provide structured information. Evidence Room returns a current-state assessment, opportunity map, recommended architecture, controls framing, and a 90-day plan. Application required. Production invoices do not enter our tools.

Hard hold. ERP remains the system of record for accounting. Named humans remain the system of record for cash. Vendor-bank change and close attestation stay human. Duplicate & Anomaly flags are hypotheses, not fraud verdicts. This book is a method, not hosted software.

How to use this book

Buy Friday. Begin Monday. Do not charter from memory.

1. Score the free diagnostic (36 questions). Honour vetoes.
2. Map one path (usually PO-goods). Code exceptions from the closed list.
3. Charter Wave 1 at L0 or L1: Intake, Validation, Matching, Triage, Duplicate & Anomaly, Orchestrator.
4. Write the payment sentence on the wall. Agent 12 annotates; humans release.
5. Shadow before any write path. Promote only with an evidence pack.

Every page should answer at least one of: What should I do? How? Who owns it? What can go wrong? How do I control it? How do I measure it? What evidence proves it works?

Northline Industrials is a *fictional* manufacturer used so tables can be concrete (~15,000 invoices/month, Dynamics 365, Cleveland SSC). Figures are illustrative, not a client result.

Customer-facing statistics are limited to the research ledger. Do not paste vendor cost-per-invoice figures into a business case as targets.

Custom Blueprint

Service: Facilitated design of *this organisation's* AP agent layer against *this organisation's* stack

Price range: \$1,500–\$3,000 USD (see PRICING_AND_SCOPE.md)

Lockup: EVIDENCE ROOM — AP AGENT OS

Motion: Application, not a cart impulse.

A Custom Blueprint is not a download of a “personalised zip” and not implementation consulting for software. It is a scoped, repeatable design engagement. Payment authorisation remains human in every deliverable. The engagement does not promise savings, fraud detection, compliance, accounting accuracy, or ROI.

Files

File	Audience
SERVICE_BROCHURE.md	Buyer
INTAKE_QUESTIONNAIRE.md	Applicant
FULFILMENT_WORKFLOW.md	Evidence Room practitioner (AI-assisted, human-accountable)
DELIVERABLE_OUTLINE.md	Both — what “done” contains
PRICING_AND_SCOPE.md	Commercial

When this is the right SKU

- More than one ERP, or a messy acquisition path.
- InfoSec / Audit will not move from a self-serve licence alone.
- Political split (SSC vs plants, AP vs Procurement).
- The buyer already holds Professional or Team and needs *their* names on *their* map.

When this is the wrong SKU: they want a bot built, a connector, a savings guarantee, or a cheap rewrite of the toolkit as their product.

Custom Blueprint — service brochure

Lockup: EVIDENCE ROOM — AP AGENT OS

Domain: evidenceroom.ai

Brand idea: Proof before permission.

Price: \$1,500–\$3,000 USD application / engagement (scoped)

Category: Facilitated design, not software.

The offer

You already have an AP stack. You may already have models. You do not have a written layer: named agents, packets, owners, and a human hold on payment that survives a vendor demo.

A Custom Blueprint is a short, facilitated design of **your** Wave 1 (and, if scoped, Wave 2 sketch) against **your** entities, ERP, and exception mix. You leave with charters that have your names on them — not a second copy of Northline Industrials. Northline in the toolkit is fictional; we will not present it as your peer.

We do not replace Coupa, SAP, Oracle, Dynamics, NetSuite, Tipalti, BILL, or your SSC. We do not connect to your ERP. We do not take production invoices home.

What you receive

See `DELIVERABLE_OUTLINE.md`. In short:

- Diagnostic band on *your* scores (you sit; we challenge).
- Path map for one agreed path.
- Six Wave 1 charters completed with your owners and exclusions.
- Human-vs-agent classification of ten of *your* exceptions and one payment run (you supply redacted materials in *your* environment).
- Autonomy register starter and two-week shadow plan.
- Steering one-pager and a written list of refusals (including payment).

Optional (upper end of range): Wave 2 sketches; enterprise overlay notes; InfoSec Q&A using the method.

What you do not receive

- Hosted agents, prompts in our cloud on your invoices, or an ERP connector.
 - A savings, payback, or ROI guarantee.
 - A fraud-detection design.
 - A compliance or audit opinion.
 - Implementation of RPA/iPaaS.
 - Permission to republish Evidence Room files as your product.
-

How it runs

1. You apply (`INTAKE_QUESTIONNAIRE.md`).
2. We accept, decline, or re-scope the price inside the published range.

3. Kickoff (90 minutes). Then structured working sessions (see fulfilment workflow).
4. We may use AI tools **internally** to draft maps and charters from the notes you already approved. A named Evidence Room practitioner is accountable for every sentence. Your production data stays in your systems.
5. Read-back. You own the signed charters.

Typical elapsed time: two to four weeks of calendar, not a six-month transformation.

Who should apply

Finance Transformation, Controller, or AP Manager who can name a Process Owner and a Controls Lead, and who can show a payment procedure. If you cannot, start with the Free Diagnostic and Professional.

Identity

We are EVIDENCE ROOM — AP AGENT OS. We are not Evidence Room LLC (forensic animation).

Close

Design the layer. Keep the stack. Withhold permission until the packet exists.

Apply via the intake. Do not send invoice images to hello@evidenceroom.ai.

Custom Blueprint — intake questionnaire

Use: Application. Incomplete applications are declined or returned, not guessed.

Do not attach: Production invoices, vendor bank details, employee personal data, or live payment files. Describe them. Redact in your environment if a session will view them.

1. Applicant

Field	Answer
Organisation	
Country of contracting entity	
Applicant name / role	
Email	
Other working-group names (if Team licence already held)	
Existing Evidence Room licence (none / Starter / Pro / Team)	

2. Stack (keep these)

Field	Answer
ERP(s) and versions if known	
Capture / IDR / portal	
Workflow / match	
Payment / bank file path	
RPA / iPaaS / copilots already in AP	
Shared service location(s)	

3. Scale (ranges are fine)

Field	Answer
Invoices / month (in-scope guess)	
Entities / countries	
Active vendors (order of magnitude)	
AP FTE on the path	
Known exception rate? Source?	

4. Holds (honest)

Question	Y / N / Unknown
Last payment run can be reconstructed with named humans	
Vendor bank changes are dual control	
You will refuse auto-release features	
A Process Owner can be named in week one	
A Controls Lead can be named in week one	
Sponsor requires a guaranteed savings number to start	

If the last row is Y, explain. We may decline. We will not write the guarantee.

5. Why Blueprint (not only Professional)

In six lines: political, multi-ERP, InfoSec, acquisition, or other. What decision will this engagement unlock?

6. Sessions

Field	Answer
Time zone	
Can you give 3× 90-minute sessions + 1 read-back in 4 weeks?	
Tools you will use for screenshare (your tenant)	
Recording permitted?	

7. Commercial

Field	Answer
Purchase order required?	
Preferred band: \$1,500 / \$2,200 / \$3,000 (see scope file)	
Billing legal name / address	

8. Declarations

- ☐ I will not send production personal or payment data to Evidence Room systems.
- ☐ I understand deliverables are design artefacts, not software and not an audit.
- ☐ I understand payment authorisation remains our human control.
- ☐ I will not republish Evidence Room materials as our product.

Signature / date: _____

Evidence Room use only

Custom Blueprint — fulfilment workflow

Audience: Named Evidence Room practitioner

Nature: Highly repeatable. AI-assisted drafts. Human-accountable deliverable.

Data: Client production data stays in the client's tenant. Our AI tools see only notes the client agreed we may keep (roles, counts, system names — not invoice images or bank details).

This workflow is how we deliver the same quality at \$1,500–\$3,000 without inventing a unique methodology each time. The *content* is theirs. The *steps* are ours.

0. Principles

1. Same method as the licensed OS. No special autonomy for paying clients.
2. Payment-always-human in every artefact.
3. AI may draft; it may not be the signatory.
4. If intake shows a guaranteed-ROI sponsor and no willingness to drop it, **decline**.
5. If they send production invoices to our mailbox, **delete, notify, do not ingest**.

1. Repeatable stages

Stage	Time (illustration)	Human	Allowed AI assist	Exit
A Accept	30–45 min	Practitioner + (if needed) founder	Summarise intake against decline rules	Mail: accept + price + dates
B Prepare	45 min	Practitioner	Draft session agenda from intake	Folder: agenda, blank charters, band page
C Kickoff	90 min live	Practitioner	Live notes only in client tool if they require	Band draft; path chosen; owners named
D Sessions 2–3	2 × 90 min	Practitioner	After session: draft map + JDs from <i>our notes</i>	Client corrects in-session or by comment
E Assemble	2–4 hours	Practitioner	Merge, consistency check, grep banned phrases	Draft pack
F Read-back	60–90 min	Practitioner	—	Redlines
G Final	60–90 min	Practitioner	Changelog	Delivered pack + closure mail
H Close	20 min	Practitioner	—	No residual client files we should not hold

Elapsed calendar: 2–4 weeks. Do not add “bonus” agents to be nice.

2. Decline rules (stage A)

Decline or re-scope if:

- They want a connector or hosted model on their invoices.
- They want us to write a guaranteed savings/ROI.

- No Process Owner will be named.
- They intend to republish the toolkit.
- Scope is “global AP all ERPs all waves” inside \$1,500.

Re-scope upward (still $\leq$ \$3,000) if: two ERPs, or InfoSec Q&A added, or Wave 2 sketches.

3. AI-assisted drafting pattern (stages D–E)

Inputs to the model (ours): session notes (roles, system names, volumes as *they stated*, exclusion lists), blank charter template, stack overview IDs.

Never input: invoice PDFs, vendor master extracts, bank IBANs, employee IDs, client legal advice.

Prompts we use internally (short):

- “Draft a Wave 1 Matching charter from these notes. Autonomy L1. Exclusions must include no GR invent, no post, no flag clear. Payment not in scope. Label any number the notes did not contain as [UNKNOWN].”
- “Turn these exception stories into class A–J. Do not invent classes.”
- “Grep-level pass: list sentences that imply savings, fraud detection, compliance, accuracy, or autonomous pay.”

Human checklist after every model draft:

- [] Every number appears in notes or is [UNKNOWN].
- [] Northline not presented as their baseline.
- [] Agent 10 language is hypothesis.
- [] Agent 12 ceiling annotate if present.
- [] Owners are their names, not ours.
- [] Banned-phrase pass clean.

If the model invents a statistic, delete it. Do not “leave it for flavour.”

4. Session scripts (compress)

Kickoff: contract of product; payment sentence; sit or challenge diagnostic; pick one path; name six owners; list informal helpers; schedule views of *their* five invoices on *their* screen.

Session 2: walk invoices; harvest codes; classify ten + payment run; start 03 and 10 charters.

Session 3: finish 01, 02, 04, 16; shadow calendar; steering page; refusals list.

Read-back: page-turn; they speak exclusions; we do not add L3.

5. Quality gates before send

Same as 00_READ_ME/REFINED_MASTER_PROMPT.md Q1–Q12, plus:

- Intake declarations on file.
- Price matches PRICING_AND_SCOPE.md band.
- Deliverable list matches what was sold.
- No client production data in our cloud.

6. Fulfilment mail (final)

Attached is your Custom Blueprint pack (design artefacts). Charters are drafts until your Process Owner and Controls sign. Payment authorisation remains your human control. We did not implement software or certify controls. We will not retain invoice images (we should have none). For method updates, see your toolkit licence if you hold one.

7. Aftercare (not in price unless scoped)

Email clarification on *our* sentences for 10 business days. We do not attend their steering as a standing member at this price. We do not run their shadow.

Document control

Field	Value
Toolkit	Evidence Room — AP Agent OS
Object	Custom Blueprint fulfilment workflow
Status	Edition 1.0.0
Not	A client-facing SOP for their AP team

Custom Blueprint — deliverable outline

Use: Acceptance checklist for both parties. If it is not on this list, it is not in the engagement unless a written re-scope says so.

All artefacts use Evidence Room — AP Agent OS method and lockup. They are tailored with the client's names, systems, and path. They are not a licence to republish the core toolkit.

Core pack (all prices in range)

#	Artefact	Form	Acceptance
1	Diagnostic band page	1–2 pp	Their scores; vetoes; L1–L5 sentence; not a certificate
2	Path map	1 path, stages with evidence columns	One entity/doc-type as agreed
3	Exception code starter	Table mapped from their language	EX-OTH watch list
4	Ten + one classification	Spreadsheet or md table	Their objects; class A–J; refusals
5	Charters × 6	JD form	01, 02, 03, 04, 10, 16; owners; L0/L1; exclusions
6	Autonomy register starter	Table	Informal helpers listed
7	Shadow plan	2-week calendar	Samples, language, rollback
8	Human hold statement	1 p	Payment, bank, DOA, close, flags
9	Steering one-pager	1 p	Decisions asked; no ROI
10	Refusal log	List	At least payment auto-release

Upper-band add-ons (if priced)

#	Artefact	When
11	Wave 2 sketches (05, 07, 08, 12)	\$2,200+
12	Enterprise overlay notes (multi-ERP / entity)	\$2,200+
13	InfoSec Q&A (access, SoR, data residency)	\$3,000
14	Operator huddle script tailored	\$3,000

Explicitly not delivered

- Working software, prompts hosted on their invoices, ERP configuration.
- Full sixteen Professional specs rewritten as “theirs” (they licence Professional/Team for those).
- UAT execution (they run Templates/UAT.md).
- A populated ROI workbook with our invented I13.
- Audit opinion, tax opinion, legal opinion.
- Training of the whole SSC (Team outlines exist; delivery is theirs unless separately scoped — not in this range).
- Standing steering membership.

Sign-off block (end of pack)

Role	Name	I accept these as design drafts, not as live authority	Date
Client Process Owner			
Client Controls			
Evidence Room practitioner			

Live authority starts only when *they* sign charters into *their* control environment.

Document control

Field	Value
Toolkit	Evidence Room — AP Agent OS
Object	Custom Blueprint deliverable outline
Status	Edition 1.0.0

Custom Blueprint — pricing and scope

Currency: USD list, exclusive of tax.

Range: \$1,500–\$3,000.

Motion: Application. Not an instant checkout of a “custom zip.”

Merchant / contracting: Confirm with counsel and, if used, Lemon Squeezy or invoice terms. This file is commercial intent, not the legal instrument.

1. How to pick a band

Band	Price	Fits when	Sessions	Deliverables
Blueprint — Path	\$1,500	One ERP, one path, owners named, Professional already in hand or bought alongside	Kickoff + 2 × 90 min + read-back	Core pack #1–10
Blueprint — Layer	\$2,200	One ERP, Wave 2 sketches, or light multi-entity (same ERP)	+1 working session	Core + #11 and/or #12
Blueprint — Contested	\$3,000	Two ERPs or InfoSec Q&A or acquisition path without a map	+2 working sessions	Core + #11–14 as agreed in acceptance mail

If they need implementation, RPA build, or multi-month change: **out of range**. Decline or refer to a separate statement of work that is not this SKU.

Starter-only buyers can apply; we usually require Professional or Team so they hold the specs the charters point to. The Blueprint does not replace those licences.

2. Inclusions (all bands)

- Named Evidence Room practitioner.
- Internal AI-assisted drafting per fulfilment workflow.
- Written artefacts listed for that band.
- 10 business days of email clarification on *our sentences*.

3. Exclusions (all bands)

- Hosted processing of invoices.
- ERP / bank connectivity.
- Guaranteed savings, ROI, fraud detection, compliance, accounting accuracy, autonomous payments.
- Travel (if ever required: actuals, separately).
- Licence to resell Evidence Room IP.
- Work beyond the agreed path without a written change.

4. Client responsibilities

- Sit or challenge the diagnostic with artefacts.
- Name Process Owner and Controls Lead.
- Show (in their tenant) five invoices and a payment-run procedure.

- IAM and operator time.
- Sign drafts into their environment if they choose to go live.

If client responsibilities slip by more than 15 business days, we may close the engagement as delivered-to-date or pause. We do not extend unpaid to “wait for the ROI committee.”

5. Payment and refunds (recommendation to counsel)

- 100% on acceptance, or 50% accept / 50% before read-back — pick one in the acceptance mail.
- Refundable if Evidence Room declines before kickoff.
- After kickoff: not refundable for completed time, subject to law and MoR policy.
- Do not advertise “money back if you don’t save money.”

6. Change control

Change	Commercial
Extra path, same ERP	+\$700 if still in calendar; else new application
Second ERP	Move to \$3,000 or new engagement
Request for L3 design	Refuse; not sold
Request for savings model populated with our I13	Refuse

7. Example (fictional)

Northline Industrials would be a **\$2,200 Layer** if they were real: one Dynamics instance, four codes, Wave 2 sketches, informal copilots. They are not a customer. Do not quote this as a case study.

Disclaimer — Draft for Counsel

Status: Working draft. **Not legal advice.** Intended for /disclaimer, checkout footers, and the zip. Counsel must confirm jurisdiction-specific wording.

Last updated: 20 September 2026

Lockup: EVIDENCE ROOM — AP AGENT OS

If this Disclaimer conflicts with a marketing sentence, **this Disclaimer controls** and the marketing sentence should be removed.

1. Nature of the product

Evidence Room — AP Agent OS is a **digital method and toolkit**. It contains written architectures, charters, frameworks, and examples to help an organisation **design, govern, and discuss** an Accounts Payable agent layer.

It is **not**:

- software that connects to, posts to, or operates your ERP
 - a payment service, money-transmission service, or bank
 - an audit, assurance, or attestation engagement
 - legal, tax, accounting, or regulatory advice
 - a certification that you meet any law, standard, or control framework
 - a fraud-detection, AML, or sanctions-screening product
 - a guarantee of any financial or operational result
-

2. Outcomes we do not promise

Without limitation, we do **not** promise or guarantee:

- savings, cost reduction, or **ROI**
- **fraud detection**, fraud prevention, or the absence of duplicate or abusive payments
- **regulatory compliance** (including but not limited to SOX, VAT/GST rules, employment, or data-protection law)
- **accounting accuracy** or correct postings
- **autonomous payment safety**
- cycle-time reduction
- “touchless AP” as an operating state
- that any model you later use will be correct

Any number in the materials labelled illustrative, fictional, or Northline Industrials is **not** a benchmark and **not** a target.

3. Payment authority

The method states that **payment authorisation and release remain human**. That is a design rule in a document. It does not itself stop a person or a vendor from wiring a model to a payment file. **You** must implement holds in your systems and policies.

We are not liable for payments you or your agents release.

4. Implementation is yours

You choose vendors, models, prompts, permissions, owners, and whether to commission any agent. You are responsible for testing, sampling, access control, and local policy.

The toolkit cannot see your invoices unless **you** paste them somewhere. Do not paste production data to us.

5. No professional relationship

Using the site or the files does not create an attorney-client, auditor-client, fiduciary, or similar relationship. Blueprint facilitation, if any, is scoped method design, not an audit opinion.

6. Third parties and names

Mentions of ERP or AP vendors are descriptive. No sponsorship or compatibility certification is implied unless a written agreement says so (none at the time of this draft).

We are **not** affiliated with Evidence Room LLC (forensic animation / evidence-room.net). See Trademark notes.

Lemon Squeezy and Stripe are independent. Their MoR and payment terms are theirs.

7. Site content

Resources, charts, and posts are educational and commercial description. They are not advice to buy or refrain from buying any security or to take any tax position.

8. Limitation pointer

Liability, to the extent it can be limited, is addressed in the Terms. **Counsel must write that limit.** Nothing here is an additional warranty.

9. Short footer (site and checkout)

Evidence Room — AP Agent OS is a digital method and toolkit. It is not an ERP, payment service, audit, or compliance certification. It does not detect fraud, authorise payments, or guarantee savings, accuracy, or ROI. You remain responsible for implementation and for all payment decisions.

Counsel checklist

- ☐ Conform to mandatory consumer wording
- ☐ Harmonise with insurance if any
- ☐ Confirm “not advice” is not over-claimed in Blueprint sales calls
