Product	AP Agent OS
Version	1.0
Date	September 2026
Use	Implementation toolkit

Responsibility is earned.

Evidence Room — AP Agent OS

Refined Master Execution Spec (v1.0)

This document is the tightened operating brief used to build the commercial product. It converts the original master prompt into locked decisions, acceptance tests, evidence rules, and an artifact contract.

0. What this product is

Evidence Room is a digital-product company that sells implementation-ready operating systems for Finance agents.

AP Agent OS is the first vertical. It is a toolkit a Finance leader can buy on Friday and use on Monday to:

1. diagnose AP agent readiness
2. map the current AP process
3. specify agents as governed roles
4. classify and route exceptions
5. set controls, KPIs and autonomy gates
6. test, shadow, pilot and expand responsibility
7. build a conservative business case
8. run a workshop or steering committee with the same language

It is not software, an ERP, a payment rail, a prompt pack, an ebook, or a promise of autonomous AP.

Category line: Operating system for Accounts Payable agents.

Anti-category: Not another AP automation platform. Not another AI prompt bundle.

1. Locked commercial decisions

Decision	Lock
Brand	Evidence Room
First product	AP Agent OS
Domain	evidenceroom.ai (primary commercial name). Fallbacks: evidenceroom.com, apagentos.com
Launch channel	Lemon Squeezy (Merchant of Record)
Geography	Global English, USD pricing, ERP-agnostic
Launch stack	Digital downloads + productised service. No custom software at launch
First buyer	Finance Director / Head of AP / Transformation lead in 200–10,000+ employee orgs
Price ladder	Free / \$79 / \$199 / \$499 / \$1,500–\$3,000
Autonomy default	Level 0 Observe or Level 1 Recommend. Autonomy is earned
Payment rule	Humans authorise payments. Always
Evidence rule	No invented statistics. Cite or label as illustrative / Evidence Room framework
Legal posture	Templates and methods, not advice. Flag professional review

2. Locked brand system

Brand idea (selected): Responsibility is earned.

Evaluated and rejected as primary:

Candidate	Verdict
Evidence over hype	Strong, slightly defensive. Kept as supporting line
AI that earns responsibility	Accurate but agent-centric, not buyer-centric
Governed agents. Measurable outcomes	Correct, too generic as a brand idea
From workflow to workforce	Clever, risks implying headcount replacement
The room where Finance proves AI works	Descriptive, not operational

Supporting line: Evidence Room turns Finance AI from experimentation into governed operating performance.

Product line: AP Agent OS — the operating system for building, governing and scaling AI agents across Accounts Payable.

Voice: Intelligent, concise, specific, executive, non-hype. Prefer nouns and verbs over adjectives.

Never say: guaranteed savings, guaranteed fraud detection, regulatory compliance as a product outcome, accounting accuracy as a guarantee, autonomous payment safety, guaranteed ROI.

Always say: human accountability remains; agents earn responsibility; Evidence Room designs the agent layer across the existing stack.

Visual lock:

- Ink #121614
- Paper #F3EFE6
- Bone #E6DFD2
- Bronze #8C7349
- Slate #4A524C
- Rule #C9C2B4
- Signal #7A2E24 (risk only)
- Ledger #2C5A4A (positive only)
- Display: Noto Serif
- Text: Inter
- Data: JetBrains Mono
- No robots, neon, purple gradients, circuit boards, stock “AI future”

3. Product principle (content filter)

Every page must answer at least one:

1. What should I do?
2. How should I do it?
3. Who owns it?
4. What can go wrong?
5. How do I control it?
6. How do I measure it?
7. What evidence proves it works?

If none, delete.

4. Commercial tests (must pass)

1. Would a Finance Director responsible for ~15,000 invoices/month pay \$199 of their own money because this saves days of research and gives a credible implementation framework?
2. Could a Transformation lead run a credible workshop tomorrow from the Team Edition?
3. Does the buyer immediately understand this is an OS for Finance agents, not a prompt pack?

If any answer is not clearly yes, revise before shipping.

Quality floor: 9/10 on content, practicality, specificity, design, credibility, differentiation, coherence, usability, commercial value.

5. Evidence protocol

For any claim about market size, cost, cycle time, exception rate, STP, AI adoption, or similar:

- Use a named source, date, and URL
- Classify as Independent / Vendor / Illustrative / Evidence Room framework
- Prefer Ardent Partners, NIST, COSO, ISO, Big Four, McKinsey, Gartner/Forrester when available
- If a figure cannot be verified, do not use it
- Customer-facing documents cite lightly; the research ledger holds the full trail

Primary independent benchmarks used in this build (June 2025, Ardent Partners State of ePayables 2025, n=204):

- Average all-in cost per invoice: \$9.84
 - Average cycle time: 8.2 days
 - Average exception rate: 18.4%
 - Straight-through processing: 35.4%
 - Best-in-Class cost: \$2.65 vs All Others \$12.42
 - Best-in-Class cycle: 2.9 days vs All Others 13.5
 - AI in use in AP: 44%; +34% planning within 12 months; 22% no current plans
 - Top AP challenges: approvals too long 49%; high exceptions 48%
-

6. Artifact contract

Build the exact hierarchy in EVIDENCE_ROOM/. Every tier ships:

- Markdown source (editable, reviewable)
- Generated commercial file (PDF / XLSX / PPTX / DOCX) where specified
- Examples and blank reusable versions where a template is the point

Do not leave stages as recommendations. Create the files.

7. Execution sequence (completed in this repo)

1. Market and competitor research
2. Customer and problem definition
3. Product architecture
4. Evidence Room methodology

5. Agent architecture (16 agents)
 6. Governance and control system
 7. KPI and economics model
 8. Core written products (Free → Team → Custom)
 9. Templates and spreadsheets
 10. Presentation products
 11. Brand and design system
 12. Product packaging
 13. Lemon Squeezy storefront copy and operations
 14. Website IA and copy
 15. Funnel and email sequence
 16. 90-day content system
 17. QA against commercial tests
 18. Final commercial package
-

8. What “done” means

A Finance leader can download Professional, open START_HERE, complete a readiness score, map one process, charter one agent, assign controls and KPIs, and brief a CFO using the supplied decks — without waiting for Evidence Room software to exist.

This material is an implementation toolkit. It is not legal, tax, accounting, audit or investment advice. Agents do not authorise payments. Humans remain accountable. Statistics are cited in the Research Ledger.
