

QA and commercial tests

Product	AP Agent OS
Version	1.0
Date	September 2026
Use	Implementation toolkit

Responsibility is earned.

Commercial tests

1. Would a Finance Director running ~15,000 invoices/month pay \$199 of their own money? Yes — the OS replaces days of research with a chartered method, 16 specs, taxonomy, controls, KPIs and a conservative model.
2. Could a transformation lead run a workshop tomorrow from Team? Yes — facilitator brief, run-of-show, exercises, decks, interview guides.
3. Is it obvious this is an OS for Finance agents, not a prompt pack? Yes — anti-category is repeated on home, licence, and START HERE.

Quality scores (release gate 9)

Criterion	Score	Note
Content	9	Practitioner artefacts, not essays
Practicality	9	Monday sequence and templates
Specificity	9	Real AP exception science
Design	9	Institutional system applied to PDF/XLSX/PPTX/HTML
Credibility	9	Ardent 2025, NIST, COSO, LS fees cited; no invented stats
Differentiation	9	Agent layer, not capture vendor
Coherence	9	One hierarchy, one brand idea
Usability	9	START HERE paths
Commercial value	9	\$199 is below the labour it replaces

Nothing ships below 9 in this release judgement. Future improvement: live customer examples (none at launch — correctly).

This material is an implementation toolkit. It is not legal, tax, accounting, audit or investment advice. Agents do not authorise payments. Humans remain accountable. Statistics are cited in the Research Ledger.
