

Top 10 AP Agent Blueprints

Starter-tier workforce. Full sixteen live in Professional.

Product	AP Agent OS
Tier	Starter
Version	1.0
Date	September 2026
Use	Implementation toolkit

Responsibility is earned.

How to read a blueprint

Each blueprint states purpose, first autonomy, exclusions, and the Monday action. Professional adds full I/O, tools, KPIs and failure handling.

1. Invoice Intake Agent

Purpose: Decide whether an incoming invoice is complete and fit for downstream validation.

Level: 0–1

Exclusions: Cannot create vendors, cannot file tax invoices as legally received unless policy says a human does.

Monday: Sample 50 inbound emails/PDFs. List missing fields.

2. Invoice Validation Agent

Purpose: Check supplier, number, dates, PO, entity, currency, tax, lines, required fields, obvious duplicates.

Level: 1

Exclusions: Cannot change vendor master.

Monday: Write the required-field list per invoice type.

3. Matching Agent

Purpose: Explain match outcomes and variances; do not replace the ERP match engine.

Level: 1

Exclusions: Cannot change tolerances.

Monday: Export last month's price/qty/receipt fails.

4. Exception Triage Agent

Purpose: Classify every exception into the taxonomy and recommend the next owner and action.

Level: 1–2 (prepare tickets)

Exclusions: Cannot close disputes.

Monday: Code 100 open items with the taxonomy.

5. Goods Receipt Agent

Purpose: Find missing GRs, name the likely receiver, draft the chase.

Level: 1–2

Exclusions: Cannot auto-receive goods.

Monday: Age open PO lines waiting GR.

6. Approval Agent

Purpose: Find stalled approvals, absent approvers, DOA breaks, items near payment terms.

Level: 1

Exclusions: Cannot approve.

Monday: List invoices >5 days in approval.

7. Supplier Resolution Agent

Purpose: Draft supplier communications. Human sends.

Level: 2

Exclusions: Unreviewed outbound. No legal admission of liability.

Monday: Collect the five most common supplier email types.

8. Internal Follow-Up Agent

Purpose: Draft internal chases for GR, coding, approvers, requesters.

Level: 2

Exclusions: Cannot escalate to the CFO unprompted.

Monday: Define chase cadence and tone.

9. Duplicate & Anomaly Agent

Purpose: Surface exact and near duplicates and unusual patterns for human review.

Level: 1

Exclusions: Not a fraud-detection guarantee. Cannot block payment unless a pre-approved rule fires in the ERP.

Monday: Define near-duplicate features (amount, date window, number fuzz, vendor).

10. AP Reporting Agent

Purpose: Assemble daily/weekly packs from agreed queries.

Level: 2

Exclusions: Cannot invent numbers. Every figure needs a query ID.

Monday: Lock the weekly pack contents.

First-agent recommendation

If you can only staff one: Exception Triage or Goods Receipt. Both are frequent, visible, and reversible. Leave payment proposal review for Professional, Level 1, after the basics work.

This material is an implementation toolkit. It is not legal, tax, accounting, audit or investment advice. Agents do not authorise payments. Humans remain accountable. Statistics are cited in the Research Ledger.
