

AP Agent OS Professional

The operating system — start here, then open one folder at a time

Product	AP Agent OS
Tier	Professional
Version	1.0
Date	September 2026
Use	Implementation toolkit

Responsibility is earned.

You are here

Professional is the complete OS for a named practitioner. It is designed so a Finance Director running ~15,000 invoices a month can stop researching and start specifying.

Open in this order

Order	Folder / file	Outcome
01	This file	Orientation
02	../01_FREE_AP_AI_READINESS	Score and baseline
03	Process_Mapping	One current-state map
04	Agent_Library/00_WORKFORCE.md	Choose agent 1
05	Templates/AGENT_CHARTER	One signed charter
06	Governance	Autonomy level and promotion gate
07	Controls	Three matrix rows minimum
08	KPI_and_Measurement	Four metrics
09	Testing	Historical pack + shadow plan
10	Business_Case	Conservative / base / upside
11	Templates	SOP, RACI, UAT, risk, plan

Team Edition adds workshop, training, steering and change packs.

Non-negotiables

1. Humans authorise payments.
2. Agents earn responsibility. Default is Observe or Recommend.
3. Deterministic match engines beat LLMs at matching.
4. No vendor accuracy statistic becomes your KPI.
5. Every agent has exclusions, an owner, and a kill switch.

What “good” looks like in 30 days

- Diagnostic scored with two people in the room
- One process mapped from observation, not memory
- One charter at Level 0/1
- Historical test results written down
- A CFO paragraph that does not say “AI transformation”

This material is an implementation toolkit. It is not legal, tax, accounting, audit or investment advice. Agents do not authorise payments. Humans remain accountable. Statistics are cited in the Research Ledger.
