

Change and Executive Communication

Product	AP Agent OS
Tier	Team
Version	1.0
Date	September 2026
Use	Implementation toolkit

Responsibility is earned.

Position the change

AP is not being replaced. Repeatable analysis and drafting move to agents under governance. Humans concentrate on judgment, suppliers, exceptions that matter, and control.

Banned line: "Turn on autonomous AI and remove your AP team."

Audiences

Audience	Fear	Message	Channel
AP analysts	Job loss; being measured unfairly	Agents start at recommend; scorecards are of the agent	Team huddle
Buyers / receivers	Email storms	Cadence caps; clustered chases	Intranet + manager
Approvers	More mail	Stall visibility, not auto-approve	Workflow banner
Suppliers	Bots making commitments	Humans still send; payments still human	Only if outbound changes
Controller / IA	Uncontrolled model	Charter, logs, SoD, kill switch	Steering
CFO	Hype and spend	One agent, four KPIs, conservative case	One-pager

Training outline (4 × 45 minutes)

1. Language: agent, level, taxonomy, evidence
2. How to review a recommendation (and how to reject)
3. Hostile content and privacy
4. Using the scorecard and raising incidents

Executive communication templates

Sponsor email (launch shadow): We are shadowing one AP agent (Goods Receipt, Level 1). It cannot post, pay, or email suppliers. We will compare its recommendations to current practice for three weeks and report accuracy, noise, and ageing. No FTE change is proposed.

Steering update: Items: queue, sample accuracy, incidents (including zero), cost, decision (hold / fix / promote / retire), next entity.

Benefits realisation

Track only what you baseline. Capacity hours, cycle, exception mix, control exceptions. Do not convert hours to dollars without Finance's method.

This material is an implementation toolkit. It is not legal, tax, accounting, audit or investment advice. Agents do not authorise payments. Humans remain accountable. Statistics are cited in the Research Ledger.
