

Lead Magnet Funnel and Email Sequence

Product	AP Agent OS
Version	1.0
Date	September 2026
Use	Implementation toolkit

Responsibility is earned.

Funnel

LinkedIn post (insight, not a pitch) → evidenceroom.ai/diagnostic → email capture (Lemon Squeezy free product or form) → Diagnostic delivery → sequence (7 emails, ~14 days) → Starter \$79 or Professional \$199 → Team \$499 for groups → Custom Blueprint application

Emails (plain, no spam)

Email 1 — Delivery Subject: Your AP AI Readiness Diagnostic Body: The file is attached / linked. Complete it with a second person in the room. Score against current practice. Reply with your stage (0–4) if you want the one-page interpretation note.

Email 2 — Misconception Subject: AP automation is not an agent operating model Most teams buy capture and still live in exceptions. Ardent's 2025 work puts average exceptions at 18.4% and STP at 35.4%. An agent layer that is not chartered becomes another unofficial spreadsheet. Tomorrow: pick the first exception code you would give a junior analyst. That is your first agent candidate.

Email 3 — First agent Subject: How to identify the first AP agent Use four filters: volume, pain, data, reversibility. Goods receipt chase and exception triage usually beat payment review. Write exclusions before prompts.

Email 4 — Responsibility Subject: Agents earn responsibility Level 0 observe. Level 1 recommend. Level 2 prepare. Level 3 execute a written list. Level 4 is rare. Payment authorisation is not a level. It is a human role.

Email 5 — Product Subject: AP Agent OS If you want the full architecture, taxonomy, control matrix and KPI dictionary, Professional is \$199. If you are taking a team into a room, Team is \$499.

Email 6 — Illustrative model Subject: A conservative way to talk to a CFO 15,000 invoices a month does not automatically produce a heroic ROI. The pack includes a model that can return an unattractive payback. That is a valid outcome.

Email 7 — Team / Custom Subject: If this is now a programme Workshop pack or a 10-day Blueprint. No software install. Humans still release payments.

CTA pair

Primary: Assess your AP agent readiness. Secondary: Explore the AP Agent OS.

This material is an implementation toolkit. It is not legal, tax, accounting, audit or investment advice. Agents do not authorise payments. Humans remain accountable. Statistics are cited in the Research Ledger.
