

Scale Roadmap and Publisher Economics

Product	AP Agent OS
Version	1.0
Date	September 2026
Use	Implementation toolkit

Responsibility is earned.

Path

1. AP digital products (this repo) — prove willingness to pay
2. Productised Blueprint — learn implementation language from real intakes
3. Selective implementation assists — still not a software company
4. Recurring subscription (later): update cycle for taxonomy, controls, KPI dictionary, office hours
5. Evidence Room Finance Agent Platform (SaaS, later): registries, scorecards, evidence packs as software
6. Horizontal modules (not now): AR, Close, Treasury, Reconciliations, Controls, FP&A

Illustrative revenue (not a forecast)

Assume LS fee ~6.5% blended (5%+\$0.50 + some international). Ignore tax.

Monthly sales mix	Gross	Net ~93.5%	Notes
80 Diagnostic (free)	0	0	List building
25 Starter	\$1,975	~\$1,847	
20 Professional	\$3,980	~\$3,721	Core SKU
4 Team	\$1,996	~\$1,866	
1 Blueprint @ \$2,500	\$2,500	~\$2,338	Capacity-capped
Total	\$10,451	~\$9,772	Illustrative mid case

Conservative month: $8 \times \$199 + 8 \times \$79 = \sim \$2,200$ gross. Upside month: $40 \times \$199 + 8 \times \$499 + 3 \times \$2,500$ — still a publishing business, not a Series A plan.

Cost

Near-zero marginal delivery (zip + email). Real costs: time, ads if any, counsel, accounting, LS fees, refunds. Do not hire delivery staff until Blueprint backlog is real.

Pricing integrity

Do not race prompt-pack pricing. \$199 is the reference SKU. If conversion is weak, improve the preview and diagnostic, not a \$29 Professional.

This material is an implementation toolkit. It is not legal, tax, accounting, audit or investment advice. Agents do not authorise payments. Humans remain accountable. Statistics are cited in the Research Ledger.
