

Evidence Room AP AI Readiness Diagnostic

About This Diagnostic

The Evidence Room AP AI Readiness Diagnostic helps Finance leaders assess organisational readiness for deploying governed AI agents across Accounts Payable. Complete the 37-question assessment in the accompanying spreadsheet to generate your readiness score.

Maturity Model

- Level 1 — Ad Hoc (0-25%): Manual processes, no automation strategy
- Level 2 — Emerging (26-45%): Some automation, early AI interest
- Level 3 — Defined (46-65%): Documented processes, pilot-ready
- Level 4 — Managed (66-85%): Systematic automation, active pilots
- Level 5 — Optimised (86-100%): Agent workforce with measured autonomy

What You Receive

- AP AI readiness score with maturity classification
- Opportunity heatmap across 10 core agent categories
- Baseline KPI worksheet for measurement
- Business case starter with industry benchmarks
- Downloadable scorecard for executive reporting

Industry Context

Ardent Partners research shows the average organisation spends \$9.40 per invoice (all-inclusive), while best-in-class teams achieve \$2.78-\$2.81. Straight-through processing averages 32.6% across organisations. These benchmarks provide context for your readiness assessment — not targets.

Next Steps

Score below 45%: Focus on process documentation and data access. Score 46-65%: Select your first bounded agent use case. Score 66%+: Begin shadow-mode testing with the AP Agent OS Professional toolkit.
