

Evidence Room AP Agent Starter Kit

Overview

The AP Agent Starter Kit provides the essential frameworks to begin designing your AP agent operating model. This kit includes the top 10 agent blueprints, exception taxonomy, governance checklist, and implementation roadmap.

The Evidence Room Principle

AI agents should be treated like employees who earn responsibility through demonstrated performance. Never position full autonomy as the default. Start at Level 0 (Observe) and progress through evidence-based stages.

Top 10 Agents to Start

- AP-INT-01 Invoice Intake Agent: Review incoming invoices and determine whether information is complete, correctly extracted and suit...
- AP-VAL-02 Invoice Validation Agent: Validate invoice header and line data against business rules, master data and compliance requirement...
- AP-MAT-03 Matching Agent: Perform PO, price, quantity and receipt matching with tolerance analysis for multi-line invoices....
- AP-TRI-04 Exception Triage Agent: Classify every AP exception into the defined taxonomy and recommend the next action....
- AP-GR-05 Goods Receipt Agent: Identify missing receipts, determine likely responsible employees and prepare follow-ups....
- AP-POQ-06 PO Quality Agent: Identify poor PO creation practices driving downstream AP exceptions....
- AP-APR-07 Approval Agent: Monitor approval workflows and identify stalls, delegation issues and deadline risks....
- AP-SUP-08 Supplier Resolution Agent: Draft supplier communications for invoice discrepancies, missing information and statement differenc...
- AP-INT-09 Internal Follow-Up Agent: Draft and manage internal follow-ups for missing GR, incorrect PO, approvals, coding and requester c...
- AP-DUP-10 Duplicate & Anomaly Agent: Identify exact and near duplicates, suspicious patterns and supplier anomalies. Not a fraud-detectio...

Human vs Agent Decision Framework

Retain human control for: payment authorisation, master data changes, fraud determinations, policy exceptions, and supplier commitments. Delegate to agents: classification, matching within tolerance, follow-up drafting, reporting, and anomaly detection.

Implementation Checklist

- Complete AP AI Readiness Diagnostic
- Secure executive sponsorship
- Document current-state process for first agent
- Establish baseline KPIs
- Write agent charter for pilot agent
- Define controls and approval gates
- Run historical test cases
- Deploy in shadow mode for 3 weeks
- Review performance and decide on autonomy progression
